Hello

With this intuitive creation in hand, you're well on your way towards endless possibilities. Its stylish design flatters your individuality while its intelligent functionality complements your lifestyle in every way.

Unleash your creativity by using the integrated 1.3 megapixel[†] Camera with multi-zoom. Share highlights of that concert with friends via MMS or capture unforgettable moments and store them for keeps. Get busy and piece videos together with the Movie Director. Add text and sound effects easily to dramatise your videos. You can also showcase your pictures in style with Slideshow. This cool feature lets you customise your presentation by adding your choice of audio, and pre-loaded transition styles and background colours.

The Nokia 3230 is Bluetooth-enabled, so you can enjoy Nokia's vast range of wireless enhancements like headsets*, car kits* and more. The choice is yours.

Go on, and explore the possibilities!

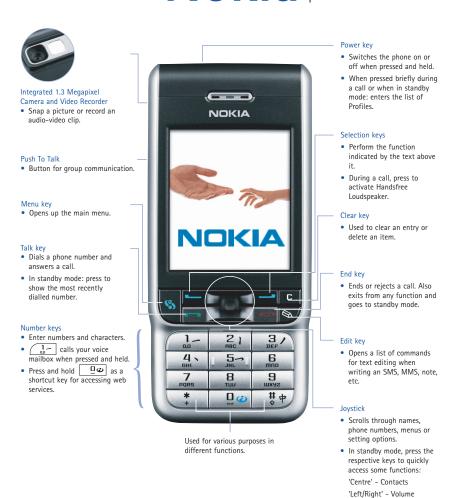

The Nokia 3230 supports a display resolution of 176×208 pixels. The image resolution shown in the advertising materials may vary from that displayed by the actual product.

Services and some features may be dependent on the network and/or SIM card, compatibility of the devices used and the content formats supported. Please read on for more details.

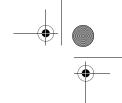

Other products and company names mentioned herein may be trademarks or trade names of their respective owners.

- ⁺ Effective resolution of 1.23 megapixel for image capture.
- * These are optional enhancements and must be purchased separately. Availability is market dependent.

Welcome to your Nokia phone

adjustment

For your safety

Read these simple guidelines. Not following them may be dangerous or illegal. Read the complete user guide for further information.

SWITCH ON SAFELY

Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless phones may be susceptible to interference, which could affect performance.

SWITCH OFF IN HOSPITALS

Follow any restrictions. Switch the phone off near medical equipment.

SWITCH OFF IN AIRCRAFT

Follow any restrictions. Wireless devices can cause interference in aircraft.

SWITCH OFF WHEN REFUELLING

Do not use the phone at a refuelling point. Do not use near fuel or chemicals.

SWITCH OFF NEAR BLASTING

Follow any restrictions. Do not use the phone where blasting is in progress.

USE SENSIBLY

Use only in the normal position as explained in the product documentation. Do not touch the antenna unnecessarily.

QUALIFIED SERVICE

Only qualified personnel may install or repair this product.

ENHANCEMENTS AND BATTERIES

Use only approved enhancements and batteries. Do not connect incompatible products.

WATER-RESISTANCE

Your phone is not water-resistant. Keep it dry.

BACK-UP COPIES

Remember to make back-up copies or keep a written record of all important information stored in your phone.

CONNECTING TO OTHER DEVICES

When connecting to any other device, read its user guide for detailed safety instructions. Do not connect incompatible products.

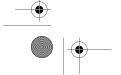

EMERGENCY CALLS

Ensure the phone is switched on and in service. Press the end key as many times as needed to clear the display and return to the start screen. Enter the emergency number, then press the send key. Give your location. Do not end the call until given permission to do so.

The wireless device described in this quide is approved for use on the EGSM 900, GSM 1800 and GSM 1900 networks. Contact your service provider for more information about networks.

When using the features in this device, obey all laws and respect privacy and legitimate rights of others.

Warning: To use any features in this device, other than the alarm clock, the device must be switched on. Do not switch the device on when wireless device use may cause interference or danger.

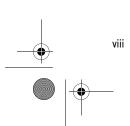

■ Network Services

To use the phone you must have service from a wireless service provider. Many of the features in this device depend on features in the wireless network to function. These Network Services may not be available on all networks or you may have to make specific arrangements with your service provider before you can utilize Network Services. Your service provider may need to give you additional instructions for their use and explain what charges will apply. Some networks may have limitations that affect how you can use Network Services. For instance, some networks may not support all language-dependent characters and services.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, they will not appear on your device menu. Contact your service provider for more information.

This device supports WAP 2.0 protocols (HTTP and SSL) that run on TCP/IP protocols. Some features of this device require network support for these technologies.

■ Shared memory

The following features in this device may share memory: contacts, text messages, and multimedia messages, images and ringing tones, video recorder, RealOne Player™, calendar, to-do notes, visual radio, and downloaded applications. Use of one or more of these features may reduce the memory available for the remaining features sharing memory. For example, saving many images may use all of the available memory. Your device may display a message that the memory is full when you try to use a shared memory feature. In this case, delete some of the information or entries stored in the shared memory features before continuing. Some of the features may have a certain amount of memory specially allotted to them in addition to the memory shared with other features.

For availability of approved enhancements, please check with your dealer. When you disconnect the power cord of any enhancement, grasp and pull the plug, not the cord.

Your phone and its enhancements may contain small parts. Keep them out of reach of small children.

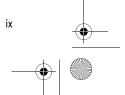

■ Enhancements, batteries, and chargers

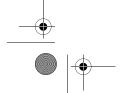

Check the model number of any charger before use with this phone. This phone is intended for use when supplied with power from ACP-7 and ACP-12.

Warning: Use only batteries, chargers, and enhancements approved by Nokia for use with this particular model. The use of any other types may invalidate any approval or warranty, and may be dangerous.

General information

Access codes

PIN code

The PIN (Personal Identification Number, 4 to 8 digits) code helps to protect your SIM card against unauthorised use. The PIN code is usually supplied with the SIM card.

After three consecutive incorrect PIN code entries, the PIN code is blocked. If the PIN code is blocked, you need to unblock it with the PUK code before you can use the SIM card again.

PIN2 code

The PIN2 code (4 to 8 digits), supplied with some SIM cards, is required to access some functions.

Lock code

The lock code (5 digits) can be used to lock the phone and keypad to avoid unauthorised use.

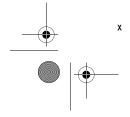

The factory setting for the lock code is 12345. To avoid unauthorised use of your phone, change the lock code. Keep the new code secret and in a safe place separate from your phone.

PUK and PUK2 codes

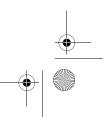

The PUK (Personal Unblocking Key, 8 digits) code is required to change a blocked PIN code. The PUK2 code is required to change a blocked PIN2 code. If the codes are not supplied with the SIM card, contact the operator whose SIM card is in your phone for the codes.

Note: Before removing the cover, always switch off the power and disconnect the charger and any other device. Avoid touching electronic components while changing the covers. Always store and use the device with the covers attached.

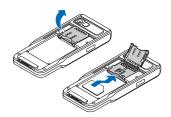

1. To open the phone slide the phone cover towards the bottom of the phone.

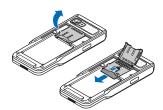

2. Open the memory card holder by pulling it up gently. Insert the SIM card into the lower slot. Make sure that the bevelled corner on the SIM card is facing towards the top of the phone and that the golden contact area on the card is facing downwards.

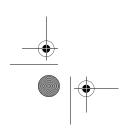

Getting started

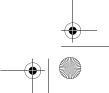

3. To remove the SIM card, open the memory card holder and use the slider to slide the SIM card out of the card holder.

 Insert the MultiMediaCard (MMC) into the holder's slot. Make sure that the bevelled corner and golden contact area of the MMC are facing downwards.

- Close the memory card holder by pressing it downwards until locked.
- Align the golden contacts of the battery with the corresponding connectors on the phone, and push the opposite end of the battery until it snaps into place.

Keep all SIM cards out of the reach of small children. For availability and information on using SIM card services, contact your SIM card vendor. This may be the service provider, network operator, or other vendor.

Use only compatible Multimedia cards (MMC) with this device. The compatible MMC for your device is Reduced Size Dual Voltage MultiMediaCard. Other memory cards, such as Secure Digital (SD) cards, do not fit in the MMC card slot and are not compatible with this device. Using an incompatible memory card may damage the memory card as well as the device, and data stored on the incompatible card may be corrupted.

You can remove or replace the Multimedia card during phone operation without switching the phone off.

Important: Do not remove the Multimedia card when the phone is switched on in another way as described below. Loss of data may be the result.

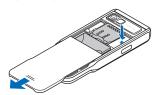

2. Select **Menu** → **Extras** → Memory card. and select **Options** \rightarrow *Remove mem. card* or press the dip switch right to Multimedia card holder.

The phone displays the message: Removing memory card will close all open applications. Remove anyway?

- 3. Press **Yes** and turn the phone.
- 4. Open the Multimedia card holder, remove or replace the Multimedia card and close the card holder.
- 5. Turn the phone and press **Ok**.
- 6. Close the phone cover.

Charging the battery

1. Connect the power cord to the charger.

- 2. Connect the other end of the power cord from the charger to the base of the phone.
- 3. Connect the charger to an AC wall outlet. The battery indicator bar on the display starts scrolling. Note that you can use the phone while charging. When the battery is fully charged, the bar stops scrolling.

Disconnect the charger first from the phone and the from the AC outlet. See "Battery information" on page 120.

Switching the phone on and off

Warning: Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.

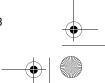

Your device has an internal antenna.

Getting started

Note: As with any other radio-transmitting device, do not touch the antenna unnecessarily when the phone is switched on. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed. Avoiding contact with the antenna area when operating the phone optimises the antenna performance and the battery life.

• Enter the lock code (displayed as ******) and press the left selection key.

The factory setting for the lock code is 12345.

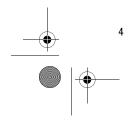

NORMAL POSITION: Hold the phone as shown in the picture above.

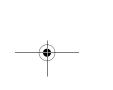

If the phone requests a PIN code:

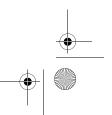

The PIN code is usually supplied with the SIM card.

• Enter the code (displayed as ****) and press the left selection key.

■ Essential indicators

 \P - The phone is being used in a GSM network.

You have received one or several messages to the Inbox folder in Messaging.

▲ - There are messages waiting to be sent in Outbox. See "Messaging" on page 49.

Y and - You have missed calls. See "Recent calls register" on page 18.

 ★ - Shown if Ringing type is set to Silent and Message alert tone, Chat alert tone, and E-mail alert tone are set to Off. See "Profiles" on page 77.

-**1** - The phone keypad is locked. See "Keypad lock (Keyguard)" on page 7.

• You have an active alarm. See "Clock" on page 93.

- All calls to the phone are diverted to another number.

A memory card is being read or written to.

• A headset is connected to the phone.

J - A loopset is connected to the phone.

- A data call is active.

▼ - A packet data (GPRS) connection is active.

₹ - Shown when the packet data connection is on hold. These icons are shown instead of the signal strength indicator (shown in the top left corner in the standby mode). See "GPRS" on page 84.

Bluetooth is active.

- An infrared connection is active

(*) - Data is being transmitted using Bluetooth. See "Bluetooth connection" on page 107.

- USB connection is active.

Use the keypad lock to prevent the keys from being accidentally pressed.

To lock: In standby mode press the left selection key and then the key. When the keys are locked, — is shown on the display.

To unlock: Press the left selection key and then • key.

When the keypad lock is on, calls still may be possible to the official emergency number programmed into your device.

Menu

Press \(\mathbb{S} \) to display the main menu. In the menu you can access all the applications in your phone.

Options in the Menu: Open, App. downloads, List view Grid view, Move, Move to folder, New folder, Memory details, Help and Exit.

Grid view or List view of the Menu

Select Options

List view or

Grid view to change between a
list or an ordered grid of the
available applications.

Moving in the Menu

 Move the joystick up, down left and right to navigate in the menu.

Opening applications or folders

 Scroll to an application or a folder and press the joystick to open it.

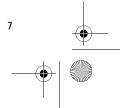

Closing applications

 Press Back or Exit as many times as needed to return to standby mode or select Options

Exit.

Your phone

Displaying and switching between open applications

- Press and hold \$\square\$ to switch from one open application to another.
 The application switching window opens showing a list of applications that are currently open. Scroll to an application and press the joystick to go to it.
- Numerous open applications may increase the demand on battery power and reduce the battery life. Exit from unused applications.

Actions common to all applications

- Opening items for viewing Scroll to an item and press the joystick, or select Options → Open.
- Editing items Open the item for viewing and select Options → Edit. Use the joystick to scroll through all fields of the item.
- Removing, deleting items Scroll to the item and select
 Options → Delete or press the
 clear key. To delete many items at
 a time, you first need to mark
 them.
- Marking an item There are several ways to select items when you are in a list.

- To select one item at a time, scroll to the item and select
 Options → Mark/Unmark → Mark or press the edit key and move the joystick at the same time. A check mark is placed next to the marked item.
- To select all items in the list, select **Options** → Mark/Unmark → Mark all.
- To mark multiple items, press and hold the edit key and then move the joystick down or up. As the selection moves, a check mark is placed next to the items. To end the selection, stop the scrolling with the joystick and then release the edit key.
 - After you have selected all the items that you want, you can move or delete them by selecting **Options** \rightarrow *Move to folder* or *Delete*.
- Unmarking an item Scroll to the item and select Options → Mark/Unmark → Unmark or press the edit key and the joystick at the same time.
- Creating folders Select Options

 → New folder. You are asked to
 give a name to the folder (max.
 35 letters).

Moving items to a folder -Select **Options** → *Move to folder* (not shown if there are no folders available). When you select Move to folder, a list of available folders opens and you can also see the root level of the application (for moving an item out of a folder). Select the location that you want the item to be moved to and press **OK**.

- Sending items Scroll to the item and select **Options** \rightarrow *Send*. Select the method, the choices are Via multimedia, Via bluetooth, Via e-mail, Via fax and Via infrared.
 - If you choose to send the item in an e-mail or a multimedia message, an editor opens. Press the joystick to select the recipient(s) from the Contacts directory or write the phone number or e-mail address of the recipient in the *To* field. Add text or sound and select **Options** \rightarrow *Send*. See "Writing and sending messages" on page 50.
 - Via Bluetooth. See "Sending data via Bluetooth technology" on page 108.

Copyright protections may prevent some images, ringing tones, and other content from being copied, modified, transferred or forwarded.

■ Volume control

Voice volume icons:

for earpiece mode,

• for loudspeaker mode.

When you have an active call or are listening to a sound, press the joystick to the right or to the left to increase or decrease the volume level, respectively.

The loudspeaker allows you to speak and listen to the phone from a short distance without having to hold the phone to your ear, for example, having it on a table nearby. The loudspeaker can be used during a call, with sound and video applications, and when viewing multimedia messages. Sound and video applications use the loudspeaker by default. Using the loudspeaker makes it easier to use other applications during a call.

To start using the loudspeaker during an already active call, select

Options → *Activate loudsp.*. A tone is played, is shown in the navigation bar, and the volume indicator changes.

The loudspeaker cannot be activated during a call when you have connected a headset to the phone.

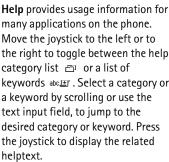

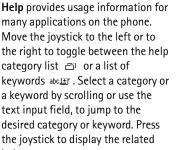

Warning: Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

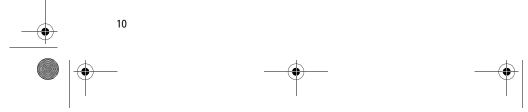

To turn off the loudspeaker when you have an active call, select **Options** \rightarrow *Activate handset*.

3. Call functions

■ Making a voice call

1. In the standby mode, enter the phone number, including the area code. To remove a number press the clear key.

For international calls, press the • key twice for the + character (replaces the international access code), and enter the country code, area code (omit the leading zero if necessary), and phone number.

- 2. Press the call key to call the number.
- 3. Press the end key to end the call (or to cancel the call attempt). Pressing the end key will always end a call, even if another application is active.

> Tip: To increase or decrease the volume during a call, move the joystick to the right or to the left.

Making a call from the Contacts application - Press 😘 and select Contacts. Scroll to the desired name; or enter the first letters of the name to the Search field. Matching contacts are listed. Press the call key to call.

Calling your voice mailbox (network service) - To call your voice mailbox, press and hold key 1 in the standby mode.

> Tip: To change the phone number of your voice mailbox, press 😘 and select Tools → Voice mailbox and select **Options** \rightarrow *Change number*. Enter the number (obtained from your service provider) and press OK.

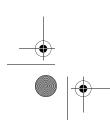

Calling a recently dialled number -In the standby mode, press the call key to access a list of the 20 last numbers you called or attempted to call. Scroll to the number you want, and press the call key to call the number.

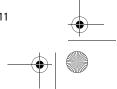

Speed dialling a phone number

To assign a phone number to one of the speed dialling keys (2 - 9), press \P and select **Tools** \rightarrow **Speed dial**. Key 1 is reserved for the voice mailbox.

To call: In standby mode, press the related key and then the call key or press and hold the related key.

Making a conference call (network service)

- 1. Make a call to the first participant.
- 2. To make a call to another participant, select **Options** \rightarrow New call. The first call is automatically put on hold.
- 3. When the new call is answered, join the first participant in the conference call. Select Options \rightarrow Conference.
 - To add a new person to the call, repeat step 2, and select **Options** \rightarrow *Conference* \rightarrow *Add to conference*. The phone supports conference calls between a maximum of six participants, including yourself.
 - To have a private conversation with one of the participants, select **Options** → *Conference* → *Private*. Select a participant and press Private. The conference call is put on hold on your phone. The other participants can still continue the conference call. Once you have finished the private conversation, select Options → Add to conference to return to the conference call.

- To drop a participant, select Options \rightarrow *Conference* \rightarrow **Drop participant**, scroll to the participant, and press Drop.
- 4. To end the active conference call, press the end key.

Answering or rejecting a call

- To answer the call, press the call key.
- To mute the ringing tone when a call comes in, press Silence.

> Tip: If a compatible headset is connected to the phone, press the headset key to answer and end a call.

• If you do not want to answer a call, press the end key to reject it. The caller will hear a line busy tone. If you have activated the **Call divert** → **If busy** function to divert calls, rejecting an incoming call will also divert the call.

Call waiting (network service)

You can answer a call while you have another call in progress if you have activated the Call waiting function in Settings \rightarrow Call settings \rightarrow Call waiting.

- To answer the waiting call, press the call key. The first call is put on hold.
- To switch between the two calls, press **Swap**. Select **Options** \rightarrow *Transfer* to connect an incoming call or a call on hold with an active call and to disconnect yourself from the calls. To end the active call, press the end key. To end both calls, select **Options** \rightarrow End all calls.

Options during a call

Many of the options that you can use during a call are network services. Select **Options** during a call for some of the following options: Mute or Unmute, Answer, Reject, Swap, Hold or Unhold, Activate handset, Activate loudsp., or Activate handsfree (if a compatible Bluetooth headset is attached), End active call or End all calls, New call, Conference, and Transfer. Select:

- Swap to switch between the active call an the call in hold.
- *Transfer* to connect an incoming call or a call on hold with an active call and to disconnect yourself from both calls.
- Replace to end an active call and replace it by answering the waiting call.

• Send DTMF - to send DTMF tone strings, for example, a password. Enter the DTMF string or search for it in Contacts. To enter a wait

Call functions

character (w) or a pause character (p), press - repeatedly. Press **OK** to send the tone.

> Tip: You can add DTMF tones to the *Phone number* or **DTMF** fields in a contact card.

■ Push to talk

\Longrightarrow Select Menu \Longrightarrow Push to talk.

Push to talk over cellular is a two-way radio service (network service) available over a GSM/GPRS cellular network. Push to talk provides direct voice communication connected with pressing the Push to talk key.

You can use push to talk to have a conversation with one person or with a group of people having compatible devices. When your call is connected, the person or group you are calling does not have to answer the phone. Besides the GPRS counters, the phone registers only one-to-one calls in the recent calls lists in Log. The participants should confirm the reception of any communications where appropriate as there is no other confirmation of

whether the recipient(s) has(have) heard the call.

To check availability and costs, and to subscribe to the service, contact your network operator or service provider. Note that roaming services may be more limited than for normal calls.

Before you can use the push to talk service, you must define the required push to talk service settings.

While connected to the push to talk service, you can use the other functions of the phone. The push to talk service is not connected to traditional voice communication, and therefore many of the services available for traditional voice calls (for example, voice mailbox) are not available for push to talk communications.

Settings for push to talk

\hookrightarrow Select **Options** \rightarrow *Settings*.

For push to talk service settings, contact your network operator or service provider. You may receive the settings over the air.

- Notification tone A tone for incoming push to talk calls.
- Default nickname Your nickname shown to other users.

Show my PTT address - Select No
if you want to hide your push to
talk address from the receivers of
your push to talk group or
one-to-one calls.

- *Domain* The default domain
- Access point name The access point name for the push to talk service.
- Server address The push to talk server address.
- *User name* Your user name used to enter the push to talk service.
- PTT password Your password used to enter the push to talk service.
- Realm The name of the domain used for group user authentication.

After modifying the settings, restart the push to talk application.

Connecting to the push to talk service

◆ Select Menu → Push to talk. Alternatively, press and hold the Push to talk key for a few seconds to connect to the service.

The push to talk application automatically attempts to connect to the push to talk service. If the login is successful, the push to talk sessions view opens.

- indicates the push to talk connection. If you have added group(s) to the phone, you are automatically joined to the active groups, and the name of the default group is displayed in standby mode.
- indicates that the service is temporarily unavailable. The phone automatically tries to reconnect to the service until you disconnect from the push to talk service.

If the login fails, you get an error note such as *Unable to switch Push to talk on.* Select **Options** → *Switch PTT on* to try to log in again, *Settings* to open the settings view, or *Exit* to close the error note.

To disconnect from the push to talk service, select **Options** \rightarrow *Deactivate*.

Options in the sessions view are: Deactivate loudsp., Active members, PTT contacts, PTT log, Settings, Help, Deactivate, and Exit.

Making a push to talk call

Select **Options** \rightarrow *Deactivate loudsp.!Activate loudsp.* to use either loudspeaker or earpiece for push to talk communication. When the earpiece is selected, you can use the phone normally to your ear.

Warning: Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

To make a push to talk call

 Select Options → PTT contacts and search for a contact person or a group.

To open the *Push to talk groups* view, press the joystick to the right.

2. Press the Push to talk key or the call key. This starts a push to talk call.

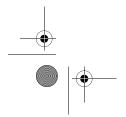

OR

Select **Options** \rightarrow *Send callback req.*. This sends a callback request to the selected push to talk contact or group.

A tone sounds indicating that the access is granted, and the phone displays your nickname and group name.

3. To request a speech turn, press the **Push** to talk key. The phone sends your request. Wait until your phone receives a speech turn signal. When the phone displays *Talk*, you have 30 seconds to talk on your speech turn.

Press and hold the Push to talk key the entire time you are talking, and hold the phone in front of you so that you can see the display. When you have finished, release the key. Talking is allowed on a first-come, first-served basis. When someone stops talking, the first person to press the Push to talk key can talk next.

- 4. To switch between several active sessions, select Swap.
- 5. To end the active session, select Deactiv..

If you have other active sessions, the phone moves to the next session.

If there are no other sessions, the phone displays a note stating that there are no active sessions.

6. To exit the push to talk application, select **Options** \rightarrow **Exit**

Receiving a push to talk call

A short tone notifies you of an incoming group or a one-to-one call. Press Accept to receive the call or Silence to reject it.

When receiving a group call, the group name and the nickname of the caller are displayed. When receiving a one-to-one call from a person whose information you have saved

in *Contacts*, the saved name is displayed if identified; otherwise, only the nickname of the caller is displayed.

Callback requests

 \hookrightarrow Select **Options** \rightarrow *PTT contacts* or PTT log.

Sending a callback request

If you make a one-to-one call and do not get a response, you can send a request for the person to call you back. You can send a callback request in different ways:

- To send a callback request from the contacts list in the Push to talk menu, select Options $\rightarrow PTT$ contacts. Scroll to a contact and select **Options** \rightarrow *Send callback* req..
- To send a callback request from the Contacts, move the joystick down in standby mode, and scroll to the desired contact. Press **Details**, scroll to the push to talk address and select **Options** \rightarrow Send callback req..
- To send a callback request from the group list in the Push to talk menu, select **Options** \rightarrow *PTT* contacts and move the joystick to the right. Scroll to the desired group and select **Options** \rightarrow Send callback req..

 To send a callback request from the callback request list in the Push to talk menu, select Options → PTT log. Select Received callback reqs. and select Options → Open. Scroll to a contact and select Options → Send callback req..

Saving the callback request sender

When you receive a callback request from someone who is not in your contacts list, you can save the name to your contacts.

- To open the request, select
 Options → PTT log → Received callback regs..
- Scroll to the a contact and select
 Options → Add to Contacts.

Using groups

igoreapsilon Select **Options** ightarrow *PTT contacts*.

When you call a group, all members joined to the group hear the call simultaneously.

Each member in the groups is identified by a user name given by the service provider. Group members can choose a nickname for within each group, which is shown as a caller identification.

Groups are registered with a URL address. One user registers the group URL in the network by joining the group session the first time.

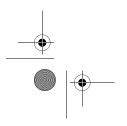

Adding a group

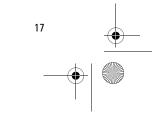

- Select Options → PTT contacts and then move the joystick to the right. This opens the Push to talk groups view.
- 2. Select **Options** \rightarrow *Add group* \rightarrow *Create new*.
- 3. Enter a *Group name*, and press **OK**.
- 4. Select a *Group privacy* level.
- 5. Enter your own nickname in *Nickname in group*.
- To add a thumbnail image to the group, select **Options** → Add thumbnail.
- Press Done. To add members and to send an invitation to the group, press Yes when the phone requests for Send group invitation to all members now?.
 This opens a view where you can select members for the group.

The members you invite to the open groups can also invite more members to the group.

Joining an existing group

For group detail information, contact your network operator or service provider. You may receive the details over the air.

- 1. Press Menu \rightarrow Push to talk \rightarrow PTT contacts and then move the joystick to the right. This opens the *Push to talk groups* view.
- 2. Select **Options** \rightarrow *Add group* \rightarrow Join existing.
- 3. Enter the *Group address*, *Group* name, and Nickname in group. You can also add a *Group* thumbnail.
- 4. Press Done.

Receiving an invitation

When you receive a text message invitation to a group, you get following information:

- From View the contact information of the person who sent the invitation.
- *Nickname* View the nickname of the person who sent the invitation.
- **Group name** View the name of the group if the group is not a secured group.

Group address - View the group address if the group is not a secured group.

Select **Options** \rightarrow *Save group* to add the group to your phone. After the group is saved, the phone asks whether you want to connect to the saved group.

To reject the invitation, press **Back** and Yes.

Call register and general log

In the log, you can monitor information about phone calls, text messages, packet data connections, and fax and data calls registered by the phone. You can filter the log to view just one type of event and create new contact cards based on the log information.

Connections to your remote mailbox, multimedia messaging centre, or browser pages are shown as data calls or packet data connections in the general communications log.

Recent calls register

 \Longrightarrow Select Menu \rightarrow Log \rightarrow Recent calls.

The phone registers the phone numbers of missed, received, and dialled calls, and the approximate duration of your calls. The phone registers missed and received calls only if the network supports these functions, and the phone is switched on and is within the network's service area.

Options in the Missed, Received, and Dialled views: Call, Create message, Use number, Delete, Clear list, Add to Contacts, Help, and Exit.

Missed calls and received calls

To view a list of the last 20 phone numbers from which somebody has tried to call you without success (network service), go to $Log \rightarrow$ Recent calls \rightarrow Missed calls.

To view a list of the 20 numbers or names from which you have most recently accepted calls (network service), go to $Log \rightarrow Recent calls \rightarrow$ Received calls.

Dialled numbers

To view the 20 phone numbers that you have most recently called or attempted to call, go to $Log \rightarrow$ Recent calls \rightarrow Dialled nos..

Erasing recent call lists

- To clear all recent call lists, select **Options** → *Clear recent calls* in the Recent calls main view.
- To clear one of the call registers, open the register you want to erase and select **Options** \rightarrow *Clear* list.
- To clear an individual event, open a register, scroll to the event, and press the clear key.

Call duration

igorplus Select Menu ightarrow Log ightarrow Call duration.

Allows you to view the approximate duration of your incoming and outgoing calls.

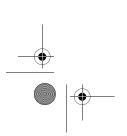

Note: The actual time invoiced for calls by your service provider may vary, depending on network features, rounding off for billing, and so forth.

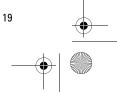

Erasing call duration timers - Select Options \rightarrow *Clear timers*. For this, you need the lock code. See "Security" on page 86.

Viewing the general log

igoplus Select **Menu** ightarrow **Log** and move the joystick to the right.

In the general log, for each communication event, you can see the sender or recipient name, phone number, name of the service provider, or access point.

Sub-events, such as a text message sent in more than one part and packet data connections, are logged as one communication event.

Filtering the log

- 1. Select **Options** \rightarrow *Filter*. A list of filters opens.
- 2. Scroll to a filter and press Select.

Erasing the contents of the log

• To erase all the log contents, Recent calls register, and Messaging delivery reports permanently, select $\mathbf{Options} \rightarrow$ Clear log. Confirm by pressing Yes.

Packet data counter and connection timer

• To view how much data, measured in kilobytes, has been transferred and the approximate length of a certain GPRS connection, scroll to an Incoming or Outgoing event with the access point icon 🔓 and select Options \rightarrow *View details*.

Log settings

- Select **Options** → *Settings*. The list of settings opens.
 - Log duration The log events remain in the phone memory for a set number of days after which they are automatically erased to free memory.
 - If you select *No log*, all the log contents, Recent calls register, and Messaging delivery reports are permanently deleted.
 - Show call duration. See "Call duration" on page 19.

GPRS data counter

 \Longrightarrow Select Menu \rightarrow Log \rightarrow GPRS

The GPRS data counter allows you to check the approximate amount of data sent and received during packet data (GPRS) connections.

4. Writing text

You can enter text, for example, when writing messages, using traditional or predictive text input.

Using traditional text input

The indicator is shown on the top right of the display when you are writing text using traditional text input.

- Press a number key (1 9), repeatedly until the desired character appears. Note that there are more characters available for a number key than are printed on the key.
- To insert a number, press and hold the number key.
 To switch between letter and number mode, press and hold the # key.
- If the next letter is located on the same key as the present one, wait until the cursor appears (or move the joystick to the right to end the time-out period), and then enter the letter.

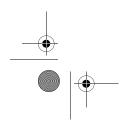

- To insert a space, press the key 0.
 To move the cursor to the next line, press the key 0 three times.
- To switch between upper and lower case, press the # key.

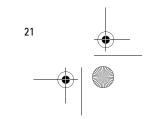

Using predictive text input

You can enter any letter with a single keypress using predictive text input. To activate predictive text input, press the edit key and select *Dictionary on.* This activates predictive text input for all editors in the phone. The indicator is shown at the top of the display.

- Write the desired word by pressing the keys 2 - 9. Press each key only once for one letter. The word changes after every key press
- 2. When you have finished the word, check that it is correct.
 - If the word is correct, you can confirm it by moving the joystick to the right or by pressing the key 0 to insert a space. The underlining disappears and you can begin to write a new word.

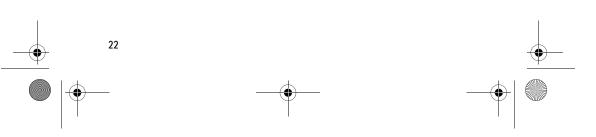

- Press the . key repeatedly to view the matching words the dictionary has found one by one.
- Press the edit key and select $Dictionary \rightarrow$ Matches to view a list of matching words. Scroll to the word you want to use and press the joystick to select it.
- If the? character is shown after the word, the word you intended to write is not in the dictionary. To add a word to the dictionary, press Spell, enter the word (max. 32 letters) using traditional text input, and press **OK**. The word is added to the dictionary. When the dictionary becomes full, a new word replaces the oldest added word.
- To remove the ? and clear characters one by one from the word, press the clear key.

- To change between the different character cases Abc, abc, and ABC, press the # key. Note that if you press the # key twice quickly the predictive text input is turned
- To insert a number in letter mode. press and hold the desired number key, or press the edit key and select number mode, enter the numbers you want, and press
- The most common punctuation marks are available under the key 1. Press key 1 repeatedly to reach the desired punctuation mark.

Press the - key to open a list of special characters. Use the joystick to scroll through the list and press **Select** to select a character, or press the edit key and select Insert symbol.

The predictive text input tries to guess which commonly used punctuation mark (.,?!') is needed. The order and availability of the punctuation marks depend on the language of the dictionary.

Writing text

When a word has been entered with predictive text on, you can press the edit key, select *Dictionary* and select:

- Matches To view a list of words that correspond to your key presses. Scroll to the desired word and press the joystick.
- Insert word To add a word (max. 32 letters) to the dictionary by using traditional text input. When the dictionary becomes full, a new word replaces the oldest added word.
- Edit word To open a view where you can edit the word, available only if the word is active (underlined).
- *Off* To turn off predictive text input for all editors in the phone

Writing compound words

 Write the first half of a compound word and confirm it by moving the joystick to the right. Write the last part of the compound word and complete the compound word by pressing the key 0 to add a space.

Copying text to the clipboard

To copy text to the clipboard, the following are the easiest methods:

- To select letters and words, press and hold the edit key. At the same time, move the joystick to left or to the right. As the selection moves, text is highlighted.
 - To select lines of text, press and hold the edit key. At the same time move the joystick up or down.
- To end the selection, release pressing the joystick while still holding the edit key.
- To copy the text to the clipboard, while still holding the edit key, press Copy.

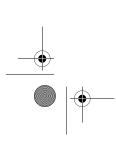

Or, release the edit key and then press it once to open a list of editing commands, for example, *Copy* or *Cut*.

If you want to remove the selected text from the document, press the clear key.

 To insert the text into a document, press and hold the edit key and press Paste.

Or, press the edit key once and select *Paste*.

5. Personal information

In Contacts, you can store and manage contact information, such as names, phone numbers, and addresses.

You can also add a personal ringing tone, voice tag, or a thumbnail image to a contact card. You can create contact groups, which allow you to send text messages or e-mail to many recipients at the same time. Contact information can only be sent to or received from compatible devices.

Options in the Contacts directory: Open, Call, Create message, New contact, Open conversation, Edit, Delete, Duplicate, Mark/Unmark, Copy to SIM direct., Send, Contacts info, SIM directory, Help, and Exit.

Managing contacts

Options when editing a contact: Add thumbnail/Remove thumbnail, Add detail, Delete detail, Edit label, Help, and Exit.

- Press the joystick in standby mode or go to Menu → Contacts.
- 2. Select **Options** \rightarrow *New contact*.
- 3. Fill in the fields you want and press **Done**.
- To edit a contact, open it and then select Options → Edit.
- To delete a contact, open it and select Options → Delete.
- To attach a small thumbnail image to a contact, open the contact card, select Options → Edit and then select Options → Add thumbnail.
- To assign default numbers and addresses to a contact, open the contact card and select Options
 → Defaults. A pop-up window opens, listing the different options.
- To copy names and numbers from a SIM card to your phone, select Options → SIM directory, scroll to the name(s) you want to copy and select Options → Copy to Contacts.

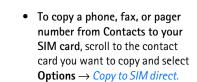

Adding a ringing tone

You can set a ringing tone for each contact card and group. When that contact or group member calls you, the phone plays the chosen ringing tone (if the caller's telephone number is sent with the call and your phone recognises it).

- 1. Press the joystick to open a contact card or go to the Groups list and select a contact group.
- Select **Options** → *Ringing tone*.
 A list of ringing tones opens.
- Use the joystick to select the ringing tone you wish to use for the contact or group and press Select.
- To remove the ringing tone, select *Default tone* from the list of ringing tones.

Voice dialling

 \hookrightarrow Select **Menu** \rightarrow **Contacts**.

You can make a phone call by saying a voice tag that has been added to a contact card. Any spoken word(s) can be a voice tag.

Before using voice tags, note that:

- Voice tags are not language-dependent. They are dependent on the speaker's voice.
- You must say the name exactly as you said it when you recorded it.
- Voice tags are sensitive to background noise. Record voice tags and use them in a quiet environment.
- Very short names are not accepted. Use long names and avoid similar names for different numbers.

Note: Using voice tags may be difficult in a noisy environment or during an emergency, so you should not rely solely upon voice dialling in all circumstances.

Adding a voice tag to a phone number

Voice tags can only be added to phone numbers stored in the phone's memory. See "Managing contacts" on page 24.

- In the Contacts main view, scroll to the contact that you want to add a voice tag to, and press the joystick to open the contact card.
- Scroll to the number that you want to add the voice tag to, and select Options → Add voice tag.

- 4. After recording, the phone plays the recorded tag and the note *Playing voice tag* is displayed.
- 5. When the voice tag has been successfully saved, the note *Voice tag saved* is displayed and a beep sounds. A symbol ⑤ can be seen next to the number in the contact card.

Making a call by saying a voice tag

- In standby mode, press and hold the right selection key. A short tone is played and the note Speak now is displayed.
- 2. To make a call by using a voice tag, hold the phone at a short distance away from your mouth and face and pronounce the voice tag clearly.
- The phone plays the original voice tag, displays the name and number, and after a few seconds dials the number of the recognised voice tag.
- If the phone plays an incorrect voice tag, or you want to retry voice dialling, press Retry.

Voice dialling cannot be used when a data call or a GPRS connection is active.

Assigning speed-dialling kevs

Speed dialling is a quick way to call frequently used numbers. You can assign speed-dialling keys to eight phone numbers. The number 1 is reserved for the voice mailbox.

- Open the contact card for which you want a speed-dialling key and select **Options** → Assign speed dial.
- Scroll to a number and press
 Assign. When you return to the contact information view, you can see the speed-dial icon next to the number.
- To call the contact by speed-dialling, go to standby mode and press the speed-dialling key and the call key.

Presence

 \Longrightarrow Select **Menu** \Longrightarrow

Presence.

Options in the Presence view:
Open, My availability, Viewers,
Update presence, Login, Logout,
Settings, Help, and Exit.

Changing your availability information igoreapsilon Select **Options** $\rightarrow My$

availability and select:

- Available You are available for people to call or send you messages. For example, when you have chosen this option for your general profile. See "Profiles" on page 77.
- Busy You may be available for people to call or send you messages, for example, when your phone is in meeting profile.
- Not available You are not available for people to call or send you messages, for example, when your phone is in silent profile.

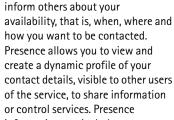

Changing who can view your Presence information

igoplus Select **Options** o *Viewers* and select:

- Public pres. Displays limited information, for managing ways for people to contact you. This is available to anyone you have not blocked.
 - My availability Select Available, Busy, or Not available.

Use Presence (network service) to

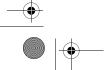

information can include your availability, whether you prefer people to call or send messages, where you are and what you are doing.

Before you can use Presence, you need to find a service that you want to use and then save the settings of that service. You may receive the settings in a special text message, called a smart message, from the service provider that offers the Presence service. See "Receiving smart messages" on page 53. For more information, contact your service provider.

The Presence application allows you to change your own published information and manage who is authorised to see your presence. To view the presence information of others, you must use Contacts. See "Contacts" on page 24.

Personal information

- Viewers Opens the Current viewers view of your Public pres.. See "Public viewers" on page 28.
- Update presence Updates your presence information to the presence server.
- Login/Logout Connect to or disconnect from the presence server. See "Chat and Presence servers" on page 68.
- Settings Manage the publishing of your presence information.
- Private pres. Displays private information, so you can share more personal information. This is only available to those that you have authorised to view your private information. You can select the following options:
 - My availability Select Available, Busy, or Not available.
 - Private message- Write a text message of up to 40 characters to describe your current availability.
 - My presence logo Add a logo to your availability information. Logo files are stored in the Gallery. See "Gallery" on page 34.

- Viewers Opens the Private list view of your Private pres..
 See "Private viewers" on page 29.
- Update presence Updates your presence information on the presence server.
- Login/Logout Connect to or disconnect from the presence server. See "Chat and Presence servers" on page 68.
- Settings Manage the publishing of your presence.
- Blocked pres. Displays a screen containing no personal details.
 See "Blocked viewers" on page 29.

Public viewers

Select *Public pres.* and select **Options** \rightarrow *Viewers* \rightarrow *Current viewers* to see the names, phone numbers, or user IDs of the viewers whom you do not allow to view your private presence messages, but who are currently viewing your public presence. You can scroll to a viewer, press **Options**, and select:

- Add to private list Allows the viewer to also see your private presence.
- Block Prevents the viewer from seeing your presence information.

- Add to contacts Adds the viewer to your Contacts directory.
- Reload lists Connect to the presence server to update the viewer lists. This option is only available when you are offline.

Private viewers

Select *Private pres*. and select **Options** \rightarrow *Viewers* \rightarrow *Private list* to see the names, phone numbers, or user IDs of the viewers who you allow to view your private presence messages. To prevent a viewer from seeing your private presence messages, scroll to the viewer and press the clear key. You can scroll to a viewer, press **Options**, and select:

- Add new Adds a new viewer manually or from your Contacts directory. You can only select a contact who has a user ID in the contact card.
- Block Prevents the viewer from seeing your presence information.
- Add to contacts Adds the viewer to your Contacts directory.
- Remove from list Removes the viewer from the private list. The option is available also when there are marked items selected. If the list is empty, the option is not available.

Personal information

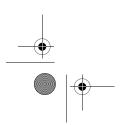

- View details Shows the user ID information of the viewer.
- Reload lists Connect to the presence server to update the viewer lists. This option is only available when you are offline.

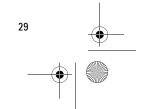

Blocked viewers

Select **Options** \rightarrow *Viewers* \rightarrow *Blocked pres.* to see the viewers you prevented from seeing your public and private presence messages. To allow a viewer to see your presence information, scroll to a viewer and press the clear key. You can scroll to a viewer, press **Options**, and select:

- Add to private list Allows the viewer to also see your private presence.
- Add new Add a new viewer manually or from your Contacts directory. You can only select a contact who has a user ID in the contact card.
- Add to contacts Adds the viewer to your Contacts directory.
- View details Shows the user ID information of the viewer.
- Reload lists Connect to the presence server to update the viewer lists. This option is only available when you are offline.

Personal information

Updating your Presence information

 \Longrightarrow Select Menu \Longrightarrow Presence.

Once the connection has been established:

- Enter your user ID and password and press the joystick to login.
 You obtain the user ID and password from your service provider.
- Select Options → Update
 presence. The option is available
 when you are logged into the
 server and have changed your
 presence information in either
 the Private pres. or Public pres.
 view and not updated it.
- 3. To log out, select **Options** → *Logout*.

Presence settings

Select Options → Settings.

See "Chat and Presence servers" on page 68.

- Show presence to Select:
 - Private & public Both public and private presence is published.
 - Private viewers Only private viewers can see your presence information.

- Public viewers Both public and private viewers see your public presence information.
- No one Your presence information is not published.
- Sync. with Profiles Defines which Presence attributes are changed when you change your profile. Select:
 - Off The presence attributes are not changed, even if you change your profile.
 - On Both My availability and Private message are changed when you change your profile.
 - Availability only Private message is not changed when you change your profile.
 - Private msg. only My availability is not changed when you change your profile.

Positioning

⇔ Select **Menu** → **Positioning**.

Positioning (network service) allows the network to detect the approximate position of your phone. By enabling or disabling positioning, you choose when your position information is provided to the network.

Personal information

To enable positioning in your phone, select Settings \rightarrow Positioning \rightarrow On. When you receive a Position request

When you receive a *Position request*, a message is displayed showing the service that is making the request. Press **Accept** to allow your position information to be sent, or press **Reject** to deny the request.

Position request messages are logged in the *Recv. requests* list.

To view them, select **Menu** → *Positioning* → *Recv. requests*. The icon beside each request indicates whether the request is new, rejected, or accepted. To see details of a request, scroll to the request and press the joystick. To clear the *Recv. requests* list, select **Options** → *Clear list*.

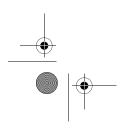

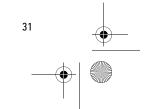

In the Calendar, you can keep track of your appointments, meetings, birthdays, anniversaries, and other events. You can also set a calendar alarm to remind you of upcoming events. The Calendar function uses shared memory. See "Shared memory" on page ix.

Creating calendar entries

- Select **Options** → *New entry* and select:
 - Meeting Reminds you of an appointment that has a specific date and time.
 - *Memo* Write a general entry for a day.
 - Anniversary Reminds you of birthdays or special dates.
 Anniversary entries are repeated every year.
- 2. Fill in the fields. Use the joystick to move between fields.
 - Subject Occasion Write a description of the event.
 - Location The place of a meeting, optional.
 - Start time, End time, Start date, and End date.
 - Alarm Press the joystick to activate the fields for Alarm time and Alarm date.
 - Repeat Press the joystick to change the entry to be repeated. Shown with in the Day view.

- Repeat until Set an ending date for the repeated entry, for example, the last date of a weekly course you are taking. This option is shown only if you have selected to repeat the event.
- Synchronisation Private -After synchronisation the calendar entry can be seen only by you and it will not be shown to others even if they have online access to view the calendar. Public - The calendar entry is shown to others who have access to view your calendar online. *None* - The calendar entry will not be copied when you synchronise your calendar.
- 3. To save the entry, press **Done**. To edit or delete a repeated entry, choose how you want the changes to take effect: All occurrences - all repeated entries are changed *This* entry only - only the current entry is changed.

Calendar views

Options in the different calendar views: Open, New entry, Week view Month view, Delete, Go to date, Send, Settings, Help, and Exit.

Press the # key in the Month, Week, or Day views to automatically highlight today's date.

To write a calendar entry, press any number key (1 - 0) in any calendar view. A Meeting entry is opened and the characters you keyed in are added to the Subject field.

- To go to a certain date, select **Options** \rightarrow *Go to date*. Write the date and press OK.
- Icons in Day and Week views:

27 - **Memo** and

— - Anniversary.

• Synchronisation icons in Month

- Private, - Public

- None, and _ - the day has more than one entry.

■ To-do

memory" on page ix.

 \Longrightarrow Select Menu \Longrightarrow To-do. In To-do, you can keep a list of tasks that you need to do. The To-do list

1. To start to write a to-do note, press any number key (1 - 0). The editor opens and the cursor blinks after the letters you have keyed in.

uses shared memory. See "Shared

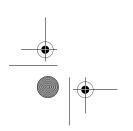

Personal information

- 2. Write the task in the Subject field. Press the . key to add special characters.
 - To set the due date for the task, scroll to the *Due date* field and enter a date.
 - To set a priority for the to-do note, scroll to the *Priority* field and press the joystick.
- 3. To save the to-do note, press Done. If you remove all characters and press Done, the note is deleted, even if you edit a previously saved note.
- To open a to-do note, scroll to it and press the joystick.
- To delete a to-do note, scroll to it and select **Options** \rightarrow *Delete* or press the clear key.
- To mark a to-do note as completed, scroll to it and select **Options** \rightarrow *Mark as done*.
- To restore a to-do note, select **Options** \rightarrow *Mark as not done.*

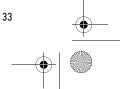

■ Importing data from compatible phones

You can move calendar, contacts, and to-do data from compatible Nokia phones to your phone using the Nokia PC Suite Content Copier application on a compatible PC.

Gallery

The Gallery uses shared memory. See "Shared memory" on page ix.

Open the Gallery to see a list of the folders in the phone memory. Move the joystick to the right to see the folders on the memory card, if you

Select a folder *Images*, *Sound clips*, or *Video clips* (or other folder that you have created) and press the joystick to open it.

In the open folder you can see:

- an icon depicting the type of each file in the folder, or in the case of an image, a small thumbnail picture which is a preview of the image
- the name of the file
- the date and time a file was saved or the size of the file
- subfolders, if present.

Options: Open (folder or item), Gallery downloads, Send, Delete, Create new, Move to folder,

New folder, Mark/Unmark, Rename, Image uploader, Receive via infrared, View details, Add to 'Go to', Settings, Help, and Exit.

You can browse, open, and create folders, as well as mark, copy and move items to folders. See "Actions common to all applications" on page 8.

Copyright protections may prevent some images, ringing tones, and other content from being copied, modified, transferred or forwarded.

Opening files

Select any file and press the joystick to open it. Each file opens in its corresponding application as follows:

- Images open in the Image viewer. See "Viewing images" on page 38.
- Sound clips open and play in the Music Player.
- Video clips, RAM files, and streaming links - Open and play in the RealPlayer application. See "RealPlayer™" on page 45.
- Subfolders open to display contents.

Other default folders

Picture messages folder

Use this folder to store pictures sent to you in picture messages.

Select the folder $lmages \rightarrow$ Picture msgs..

Options in the Picture messages folder: Open, Send, Delete, Mark/Unmark, Rename, View details, Help, and Exit.

To save a picture that you have received in a picture message, go to Messaging \rightarrow *Inbox*, open the message, and select **Options** → *Save* picture.

Wallpapers folder

Use this folder to store pictures that you want to use as background images for multimedia messages.

• Select the folder *Images* → Wallpapers.

Presence logos folder

Use this folder to store logos for Presence. See "Presence" on page 26.

• Select the folder *Images* → Presence logos.

Downloading files

 \Longrightarrow Select **Options** \Longrightarrow *Gallery* downloads.

Choose from Graphic downloads, Video downloads, or Tone downloads. The browser opens and you can choose a bookmark for the site to download from. See "Viewing

bookmarks" on page 101.

To download files, you must first configure your default access point. See "Access points" on page 82. For more information on downloading, See "Downloading" on page 104.

Once items have been downloaded, the browser closes and the phone returns to Gallery view.

Uploading images to an image server

 \hookrightarrow Select **Options** \rightarrow *Image* uploader

You can send your pictures to an image server to allow others to share your pictures online (network service).

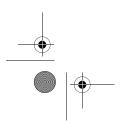

Before you can upload images, you must enter the settings for the image server. You can get these settings from your service provider.

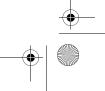

Setting up the image server

- 1. Select **Settings** → *Image servers* and press the left selection key. Fill in the details for each field. See "Access points" on page 82.
- 2. Press the right selection key.

Uploading images

- 1. To begin an upload, mark the images and select Upload.
- 2. Enter the name of the folder on the image server that the images are stored in and press the left selection key.

Camera

You can take photos and record video clips with the phone's built-in Camera application. The images are automatically saved in the Gallery application, where you can rename and organise them in folders. See "Gallery" on page 34. The phone memory or memory card is used to store the image or video, depending on the *Memory in use* setting. See "Camera settings" on page 37.

You can also send images in a multimedia message, as an e-mail attachment, or via Bluetooth technology or infrared connection. The camera produces images in JPEG and video clips in 3GP file format.

Taking a picture or recording a video clip

Options available before taking a picture / a video clip: Capture Record, New, Activate night

mode, Self-timer | Mute, Go to Gallery, Settings, Help, and Exit.

- 1. Move the joystick to left to select the still image mode or to the right to activate the video mode.
- 2. Move the joystick up to zoom in on your subject before or while taking the picture or recording a video clip. Move the joystick down to zoom out. The zoom indicator on the display shows the zoom level.
- 3. To take a picture, press the joystick (Capture). When you are taking a picture, do not move the phone before the Camera application starts to save the image. The camera shows the image and saves it automatically in Gallery. To return to the viewfinder, press Back. To take another picture, press the joystick (Capture) again.
- 4. To start recording a video clip, make sure you have first selected the video mode. Then press the joystick (Record) quickly to start recording. To pause recording at any time, press Pause. To resume recording, press Continue. When recording, you can see the recording counter, which shows the recorded time.

5. To stop recording, press **Stop**.

The camera goes into battery saving mode if there has been no key presses within a minute. To continue taking pictures, press the joystick.

You can insert an image into a contact card. See "Managing contacts" on page 24.

Night mode

If the lighting is dim and the camera needs a longer exposure time for the picture to be of good quality use the option *Activate night mode*. Note that, in dim conditions, any movement while taking a picture may cause it to be blurred.

Self timer

To trigger the camera in image mode automatically after a certain time select **Options** → *Self-timer* and select a trigger time of 10, 20 or 30 seconds. To start the *Self-timer* press **Activate**. A beep is played once in a second and during the last three seconds before trigger twice a second.

Camera settings

 \Leftrightarrow Select **Options** \rightarrow *Settings*.

In the **Camera** application settings, you can adjust the *Image* and *Video* settings.

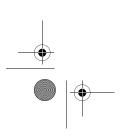

Image settings

- Show captured image Select No to be able to make pictures with a short repetition rate. The captured image is not displayed.
- Image quality High, Normal, and Basic. The better the image quality, the more memory the image consumes.
- Default image name By default, the camera names images in the format 'Image.jpg'. Default image name allows you to set a name for the images stored.
- Memory in use Select whether you want to store your images in the phone memory or on the memory card, if you use one.

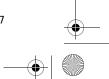

Video settings

- Length With Maximum the length of the recorded video is only restricted by the available memory. With Short the recording time is optimized for MMS-sending.
- Video resolution Select between two video resolutions:
 - 128 × 96 for standard resolution
 - 176×144 for high resolution

- Default video name By default, the camera names video clips in the format 'Video.3gp'. Default video name allows you to set a name for the video clips stored.
- Memory in use Select whether you want to store your video clips in the phone memory or on the memory card, if you use one.

Viewing images

 \Longrightarrow Select Menu \Longrightarrow Gallery.

Pictures taken with the **Camera** application are stored as images in the Gallery. See "Gallery" on page 34. Images can be sent to you in a multimedia or picture message, as an e- mail attachment, or via a Bluetooth connection. After receiving an image in the Inbox, you need to save it in the phone memory or on a memory card. You can save graphics sent to you in picture messages to the Picture messages folder. See "Picture messages folder" on page 35.

Options when viewing an image: Send, Set as wallpaper, Rotate, Zoom in, Zoom out, Full screen, Delete, Rename, View details, Add to 'Go to', Help, and Exit.

Select an image from the list of images in the *Images* folder in the Gallery to start the image viewer and display the image.

When viewing an image, moving the joystick to right or to the left takes you to the next or previous image in the current folder.

In the images thumbnail view:

- Move the joystick right or left to move between the phone and memory card.
- 2. To browse the list of images, move the joystick up and down.
- Press the joystick to open an image. When the image is open, you can see the name of the image.

You can view animated GIF files in the same way as other images.

Zooming on a saved image

- Select Options → Zoom in or Zoom out. You can see the zooming ratio at the top of the display. See "Shortcuts during zooming" on page 39.
- 2. Press **Back** to return to the initial view. The zooming ratio is not stored permanently.

When you select **Options** \rightarrow *Full screen*, the panes around the image are removed so that you can see more of the image. Press the right selection key to return to the initial view.

When you are zooming in on an image, use the joystick to move the focus to the left, right, up, or down, so that you can take a closer look at one part of the image, for example, its upper right corner.

Shortcuts during zooming

- Press key 1 to rotate by 90° anticlockwise, press key 3 to rotate by 90° clockwise. The rotation status is not stored permanently.
- Press key 5 to zoom in and key 0 to zoom out, press and hold key 0 to return to normal view.
- Press the key to change between full screen and normal view.

■ Visual Radio

You can use the Visual Radio™ application as a traditional FM radio with automatic tuning and preset channels, or with parallel visual information related to the radio program on the display, if you tune in to stations that offer Visual Radio service. The Visual Radio service uses GPRS (network service). You can listen to the FM radio while using other device applications.

To use the Visual Radio service, the following conditions are required:

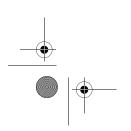

- The station you listen to and the network operator you use must support this service.
- The device must be switched on.
- The device must have a valid SIM card fitted.
- Your Internet access point must be defined for access to the operator's visual radio server.
- The preset radio channel must have the correct Visual Radio service ID defined and have Visual Radio service enabled. See "Visual Radio settings" on page 43. for details.

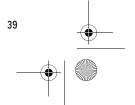

If you do not have access to the Visual Radio service, the operators and radio stations in your area may not support Visual Radio. The Visual Radio service may not be available in all areas and countries.

Note: The radio uses the wire of the headset as an antenna. A compatible headset needs to be attached to the device for the radio to function properly.

You can listen to FM radio on your phone by the built-in loudspeaker or a compatible headset. When using the loudspeaker, keep the headset plugged into the phone. The lead of the headset functions as the antenna of the radio, so let it hang freely.

Warning: Listen to music at a moderate level. Continuous exposure to high volume may damage your hearing.

You can normally make a call or answer an incoming call while listening to the radio. The radio is turned off when there is an active call. When the call is finished, you may need to turn the radio back on manually.

Note, that the quality of the radio broadcast depends on the radio station's coverage in that particular area.

Turning on the radio

- \Longrightarrow Select Menu \rightarrow Vis. Radio. The phone displays:
- Channel location number and the name of the radio channel.
- Frequency of the last used radio channel.

- Six graphic buttons:
 - and . Select to scroll to the next or previous saved channel. The buttons are inactive if there are no saved channels.
 - and . Select to start automatic tuning upwards or downwards.
 - Starts Visual Radio content feed if the Visual Service ID is defined or asks for Visual Radio ID if the Visual Service ID is not defined. See "Access to Channel Directory through Visual Radio button" on page 44).

If you have previously saved radio channels, scroll to the channel you want to listen to, or select the memory location of a channel by pressing the corresponding key 0

When using a compatible headset, press the headset key to scroll to the desired saved radio channel.

Adjust the volume by pushing the joystick to the right or to the left. To turn the radio off, press Exit.

Tuning and saving a radio channel

To start the channel search when the radio is on, select ___ or ___. Searching stops when a channel is found. To save the channel, select **Options** → *Save channel*. Select a location for the channel with the joystick and press Select. Enter the name of the channel and press OK.

Using the radio

When the radio is on, select Options and select from the following options:

- Start visual service Launch viewing of visual content. See "View Visual Content" on page 43.
- Save channel Save the radio channel you have found. See "Tuning and saving a radio channel" on page 41. Up to 20 radio channels can be saved.
- Channels Open the channel list. See "Using the channel list" on page 41
- Manual tuning Set the channel frequency manually. To move the channel search 0.05 MHz upwards or downwards, press briefly the joystick up or down.

To search quickly upwards or downwards for a channel press and hold the joystick up or down.

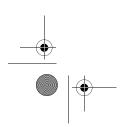

If you know the frequency of the radio channel you would like to listen to (between 87.5 MHz and 108.0 MHz), enter it and press OK.

- Activate loudsp. Listen to the radio using the integrated handsfree (IHF). The integrated handsfree allows you to speak and listen to radio or audio files without having to hold the phone to the ear. When the integrated handsfree is activated, the headset is muted.
- Deactivate loudsp. Listen to the radio using the headset.
- Settings to control Visual Radio settings. See "Visual Radio settings" on page 43.
- Help Open the context-sensitive help.
- Exit Turn off the radio.

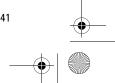

Using the channel list

When the radio is on, select **Options** \rightarrow Channels.

The channel list is used for managing the saved radio channels. The list contains 20 channels. When you open the list, the currently active channel is highlighted if it is saved. Otherwise, the first saved channel is highlighted.

Select **Options** and select from the following options:

- Channel → Listen Listen to the selected channel.
- Channel → Edit Views the settings of the highlighted channel. See "Channel setup" on page 42.
- Channel → Move Moves a channel to another position within the channel list: Highlight the channel to be moved, press Move and then highlight the position where the selected channel is to be moved. Press OK to move the channel.
- Channel → Delete Delete the highlighted channel from the channel list.
- Channel directory Activates
 Channel directory (network service) to seek available Visual Radio Stations from network and save them for later use. See
 "Channel Directory" on page 44.

- Activate loudsp. Listen to the radio using the integrated handsfree (IHF).
- *Deactivate loudsp.* Listen to the radio using the headset.
- *Help* Open the context-sensitive help.
- Exit Turn off the radio.

Channel setup

Highlight a channel in the channel list, press the joystick and select *Edit* to change following channel parameters:

- Name Select Options →
 Change to edit the name of the
 channel.
- Location Select Options →
 Change to edit the location of
 the radio station.
- Frequency Select Options →
 Change to edit the frequency of
 the channel.
- Visual service ID Select Options
 → Change to edit the Visual
 Service ID.
- Enable visual service Select
 Options → Change to allow (Yes)
 or prevent (No) the viewing of
 visual content of the current
 radio channel.

Press **Back** to return to the channel list.

View Visual Content

Visual Content can be viewed if the relating channel is saved in the channel list and Visual Service is enabled for this channel. See "Using the channel list" on page 41.

To check availability and costs, and to subscribe to the service, contact your network operator or service provider.

If the Visual Service ID was not saved in the channel list, you are asked for the Visual Service ID. Enter the Visual Service ID and press **OK**. If you do not have the Visual Service ID, press **Retrieve** to access the Channel Directory (network service). See "Channel Directory" on page 44.

When the connection to the Visual Service is established, the display shows the current Visual Content and the GPRS signal icon **G**. The Visual Content can consist of images, text, buttons and entry fields and is designed by the content provider.

To navigate through the displayed content, push the joystick up or down. The focus will jump from item to item.

If no valid Visual Content is available from the service the radio station logo or the Visual Radio background is displayed.

Options in the Visual Content view: Activate loudsp., Deactivate loudsp., Display settings, Help, and Fxit

To terminate the Visual Content feed but not the FM radio press **Close**. To terminate both select **Options** → Fxit.

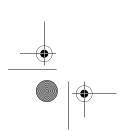

To set the mode of lights and the screensaver timeout select **Options** → *Display settings*.

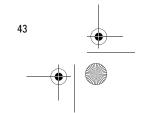

Visual Radio settings

When the radio is on, select **Options**→ *Settings* to control following
Visual Radio settings:

- Auto-start service Select
 Options → Change to enable
 (Yes) or disable (No) the
 automatic start of Visual content.
- Access point Select Options → Change to edit the access point address.

With the Channel Directory (network service) you can select Visual Radio enabled or traditional radio stations from a list, grouped in several folders. A folder may represent geographical locations, for example continents, countries, regions or cities and can contain other folders or data of radio stations.

To check availability and costs, and to subscribe to the service, contact your network operator or service provider.

To access the Channel Directory select the 👿 button and press the joystick or select *Options* in the channel list (see Using the channel list, 41) and select *Channel directory*.

Access to Channel Directory through Visual Radio button

To fetch the Visual service ID and to start Visual content for the currently tuned in radio station, select the button and press the joystick. After the connection to the Channel Directory you are requested to select the nearest location to your current position from a list of folders marked by . Highlight the desired location and press the joystick.

The device compares the frequencies of the listed radio stations with the currently tuned in frequency. If a

matching frequency is found, the Visual Service ID of the tuned radio station is displayed. Press **OK** to start viewing the Visual content. See "View Visual Content" on page 43.

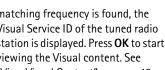

If there are more than one radio stations with matching frequencies, the relating radio stations and their Visual Service ID are displayed in a list.

Highlight the desired radio station in the list and press Select. The tuned radio station and the Visual Service ID are displayed. Press **OK** to start viewing the Visual content. See "View Visual Content" on page 43.

Access to Channel Directory through options List

To access the Channel Directory (network service) select **Options** in the channel list (see "Using the channel list" on page 41) and select Channel directory.

After the connection to the Channel Directory you are requested to select the nearest location to your current position from a list of folders marked by . Highlight the desired location and press the joystick. Repeat this process until you reach the list of radio stations near to your current position.

Radio stations, which provide Visual content are marked with \$\pi\$, traditional radio stations are marked with \$\pi\$.

Highlight the desired radio station by pushing the joystick up or down and press the joystick to open the selection menu for radio stations:

- Select *Listen* to tune to the highlighted radio station.
 To confirm the frequency setting press **Yes** or the joystick. Press **No** to go back to previously tuned frequency. The list of radio stations is displayed again and you may select an other radio station.
- Select Start visual service to open the Visual Content of the selected radio station (if available). See "View Visual Content" on page 43.
- Select Save to save the details of the selected radio station to the channel list.

RealPlayer™

With RealPlayer™, you can play local media files stored in the phone memory, or memory card, or stream media files over the air from a streaming link. The streaming link

can be activated during a browsing session or stored in the phone memory or memory card.

Media files are video, music or audio clips. Files with the extensions .3gp, .aac, .amr, .mp3, .mp4, .rm and .ram are supported by RealPlayer.

RealPlayer does not necessarily support all file formats or all the variations of a file formats. For example, RealPlayer attempts to open all .mp4 files. However, some .mp4 files may include content that is not compliant with 3GPP standards and, therefore, is not supported by this phone. In this case, the operation might fail and result in partial playback or in an error message.

RealPlayer uses shared memory. See "Shared memory" on page ix.

Options in RealPlayer when a clip has been selected: *Play*, *Continue*, *Stop*, *Mute*, *Unmute*, *Clip details*, *Send*, *Settings*, *Help*, and *Exit*.

To play a media file stored in your phone's memory or memory card, scroll to the file and press the joystick to play it, or go to RealPlayer and select **Options** → *Open* and:

To stream content over the air:

- Select a streaming link saved in the Gallery. Before your live content begins streaming, your phone connects to the site and loads the file.
- Open the link to a file in the browser.

To stream live content, you must first configure your default access point. See "Access points" on page

Many service providers require you to use an Internet Access Point (IAP) for your default access point. Other service providers allow you to use a WAP access point. Contact your service provider for more information.

In RealPlayer, you can only open an rtsp:// URL address. You cannot open an http:// URL address; however, RealPlayer recognises an http link to a .ram file since a .ram file is a text file containing an rtsp link.

Warning: Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

Shortcuts during play

When a media file is playing use the joystick to seek (move quickly through the media file), and to mute the sound, as follows:

Move the joystick up to seek forwards, or down to seek backwards through the media file.

Move the joystick left, until the indicator is displayed to mute the sound.

Move the joystick right until you see the indicator to turn on the

Changing the settings

 \Leftrightarrow Select **Options** \rightarrow **Settings** \rightarrow Video, Audio or Connection.

Move the joystick to the right or to the left to move between the different setting tabs for Video and Connection.

Select Video to change the following list of settings:

Contrast - Open the slider view to change the contrast.

Repeat - Choose On to have the currently playing video file restart automatically once it has finished.

Select Audio to change the following list of settings:

- Repeat Choose On to have the currently playing audio file restart automatically once it has finished.
- Random play Choose On to let the player select audio files by random and play them.

Select *Connection* to change the connection settings.

■ Movie Director

"muvees" are short, edited video clips that can contain video, music and text. An Quick muvee is created automatically by the Movie director after you have selected the style for the muvee. Movie director uses the default music and text associated with the chosen style. Every style has, for example, its own font style, colour, music, and pace. With Custom muvee you can select your own video and music clips, images and style, and you can also add an opening and closing message. muvees can be sent using MMS.

⇔ Select **Menu** → **Movie** and move the joystick to the right or to the left to move between the director and muvee-clip views. To return to the main view from the muvee-clip view, press **Done**.

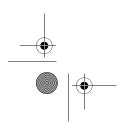

The muvee-clip view contains a list of muvee video clips that you can Play, Send, Rename, and Delete.

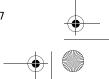

Tip: To download new styles to your phone, select Style downloads from the Movie director main view.

- To create a quick muvee, select Quick muvee, and press the joystick. Select a style for the muvee from the style list, and press the joystick. The created muvee will be saved in the Movie director muvee list. The muvee will be played automatically after saving.
- To create a custom muvee, select Custom muvee. With Video, Image, Style, or Music, choose the clips you want to include in your muvee. With Message you can add an opening text and a closing text to a muvee. Select Create muvee and select the length of the muvee:

- Multimedia message the length of the muvee is optimised for MMS sending.
- Same as music to set the muvee duration to be the same as the music clip chosen.

Options in the muvee list options menu: *Play*, *Send*, *Rename*, *Delete*, *Help* and *Exit*.

• *User defined* – to define the length of the muvee.

Press **OK** to start the muvee creation.

- To preview the custom muvee before saving it, in *Preview* muvee view, select **Options** → *Play*.
- To create a new custom muvee by using the same style settings, select Options

 Recreate.
- To add an opening text and a closing text to a custom muvee when you are creating it, in Create muvee view select Message. Enter the opening message and the closing message, and select Done.

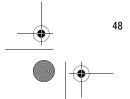

Settings

Select *Settings* to edit the following options:

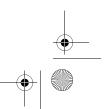

- *Memory in use* Select where to store your muvees.
- Resolution Select the resolution of your muvees.
- Default muvee name Set a default name for the muvees.

⇔ Select **Menu** → **Messaging**.

In Messaging you can create, send, receive, view, edit, and organise text messages, multimedia messages, e-mail messages, presentations, documents, smart messages, and special text messages containing data. You can also receive messages and data via an infrared or Bluetooth technology connection, receive service messages, cell broadcast messages, and send service commands.

Note that only devices that offer picture message features can receive and display picture messages.

Text messages and multimedia messages use shared memory. See "Shared memory" on page ix.

Your device supports the sending of text messages beyond the normal 160-character limit. If your message exceeds 160 characters, it will be sent as a series of two or more messages.

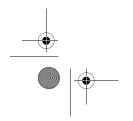

In the navigation bar, you can see the message length indicator counting backwards from 160. For example, 10 (2) means that you can still add 10 characters for the text to be sent as two messages.

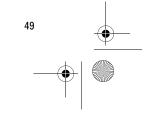

Note that using special (Unicode) characters such as ë, â, á, ì take up more space.

If there are special characters in your message, the indicator may not show the message length correctly. Before the message is sent, the device tells you if the message exceeds the maximum length allowed for one message. You can cancel sending by pressing **Cancel** or you can save the message in the draft folder.

Options in the Messaging main view are: Create message, Connect (shown if you have defined settings for the mailbox), or Disconnect (shown if there is an active connection to the mailbox), SIM messages, Cell broadcast, Service command, Settings, Help, and Exit.

When you open Messaging, you can see the New message function and a list of default folders:

Inbox - Contains received messages except e-mail and cell broadcast messages. E-mail messages are stored in the *Mailbox*. You can read cell broadcast messages by selecting **Options** \rightarrow Cell broadcast.

My folders - For organising your messages into folders.

Mailbox - When you open this folder, you can either connect to your remote mailbox to retrieve your new e-mail messages or view your previously retrieved e-mail messages offline. After you have defined settings for a new mailbox, the name given to that mailbox replaces Mailbox in the main view. See "E-mail messages" on page 60.

Drafts - Stores draft messages that have not been sent.

messages that have been sent. You can change the number of messages to be saved. See "Settings for the Other folder" on page 62.

Messages or data that have been sent via an infrared or Bluetooth technology connection are not saved in the Draft or Sent folders.

① Outbox - Is a temporary storage place for messages waiting to be sent.

Reports (network service) -You can request the network to send you a delivery report of the text messages, smart messages, and multimedia messages you have sent. To turn on delivery report reception, select **Options** \rightarrow *Settings* \rightarrow *Text* message or Multimedia message, scroll to Receive report, and select Yes.

Receiving a delivery report of a multimedia message that has been sent to an e-mail address might not be possible.

Writing and sending messages

⇔ Select **Menu** → **Messaging**.

Options in the text message editor: Send, Add recipient, Insert, Delete, Check contacts, Message details, Sending options, Help, and Exit.

Before you can create a multimedia message, or write an e-mail, or connect to your remote mailbox, you must have the correct connection settings in place. See "Settings for e-mail" on page 52. See "Settings for multimedia" on page 52.

Create: \rightarrow *Text message* to create a text message.

> To send a picture message, select **Options** \rightarrow *Insert* \rightarrow Picture.

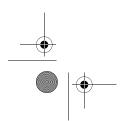

Each picture message is made up of several text messages. Therefore, sending one picture message may cost more than sending one text message.

- Create: \rightarrow Multimedia message to send a multimedia message (MMS).
 - Copyright protection may prevent some images, ringing tones, and other content from being copied, modified, transferred or forwarded.
- *Create:* \rightarrow *E-mail* to send e-mail. If you have not set up your e-mail account, you are prompted to do so.

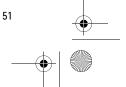

To add a media object to an e-mail, select **Options** \rightarrow $Insert \rightarrow Image, Sound clip,$ Video clip, Note or Template.

- 2. Press the joystick to select the recipient(s) from the Contacts directory or write the phone number or e-mail address of the recipient in the To: field if you are sending an MMS or e-mail to the recipient. Press the . key to add a semicolon (;) to separate each recipient.
- 3. Move the joystick down to move to the message field.
- 4. Write the message.
 - To add a media object to a multimedia message, select **Options** \rightarrow *Insert object* \rightarrow Image, Sound clip or Video clip. To add a new media object, select **Options** → $Insert\ new \rightarrow Image,\ Sound$ clip, Video clip or Slide. Select the item you wish to add. When sound has been added, the 🗾 icon is shown in the navigation bar. If you select Insert new \rightarrow Sound clip, Recorder opens and you can record a new sound. The sound is automatically saved and a copy is inserted in the message.
- 5. To send the message, select **Options** \rightarrow *Send* or press the call key.

Before you can send, receive, retrieve, reply to, and forward e-mail to a separate e-mail account, you must:

- Configure an Internet Access Point (IAP) correctly. See

Follow the instructions given by your provider.

Note: Picture message function can be used only if it is supported by your network operator or service provider. Only devices that offer picture message features can receive and display picture messages. Only devices that offer compatible multimedia message or e-mail features can receive and display multimedia messages.

Settings for multimedia

 \hookrightarrow Select **Options** \rightarrow *Settings* \rightarrow Multimedia message.

Open Access point in use and select the access point you created. See "Multimedia messages" on page 59.

You may receive the settings as a smart message from your network operator or service provider. See "Receiving smart messages" on page

For availability of and subscription to data services, contact your network operator or service provider.

The default setting of the multimedia message service is generally on.

The appearance of a multimedia message may vary depending on the receiving device.

Inbox – receiving messages

Options in the Inbox: Open, Create message, Reply, Delete, Message details. Move to folder. Mark/Unmark, Help, and Exit.

When there are unread messages in Inbox, the icon changes to * ... In Inbox, the message icons tell you what kind of a message it is. Here are some of the icons that you may see:

🔄 indicates an unread text message and 😭 indicates an unread smart message

Define your e-mail settings correctly. See "E-mail messages" on page 60.

remote mailbox and Internet service

indicates an unread WAP service message

indicates data received via infrared

(*) indicates data received via Bluetooth technology

indicates an unknown message type.

Viewing multimedia objects

Options in the Objects view are: *Open, Save, Send, Call,* and *Exit*.

To see what kinds of media objects have been included in the multimedia message, open the message and select **Options** → *Objects*. In the Objects view you can view files that have been included in the multimedia message. You can choose to save the file in your phone or to send it, for example, via infrared or Bluetooth technology to another compatible device.

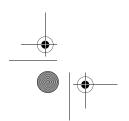

Important: Exercise caution opening messages.
Messages may contain malicious software or otherwise be harmful to your device or PC.

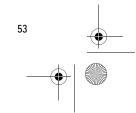

Receiving smart messages

Your phone can receive many kinds of smart messages, text messages that contain data (also called Over-The-Air (OTA) messages). See "Settings for multimedia" on page 52. and See "Settings for e-mail" on page 52 for more information on your phone settings. To open a received smart message, open the Inbox, scroll to the smart message (), and press the joystick.

- Picture message To save the picture in the Picture messages folder in the Gallery for later use, select Options → Save picture.
- Business card To save the contact information, select
 Options → Save business card.
- Ringing tone To save the ringing tone to the Gallery, select
 Options → Save.
- Operator logo To save the logo, select Options → Save. The operator logo can now be seen in standby mode instead of the network operator's own identification.
- Calendar entry To save the invitation to the Calendar, select
 Options → Save to Calendar.

Web message - To save the bookmark, select **Options** \rightarrow Save to bookmarks. The bookmark is added to the Bookmarks list in browser services.

If the message contains both browser access point settings and bookmarks, to save the data select **Options** \rightarrow *Save all*. Or, select **Options** → *View details* to view the bookmark and access point information separately. If you do not want to save all the data, select a setting or bookmark, open the details, and select **Options** \rightarrow *Save to* Settings or Save to bookmarks depending on what you are viewing.

- *E-mail notification* Tells you how many new e-mails you have in your remote mailbox. An extended notification may list more detailed information such as subject, sender, attachments, and so on.
- In addition, you can receive a text message service number, voice mailbox number, profile settings for remote synchronisation, access point settings for the browser, multimedia messaging or e-mail, access point login script settings, or e-mail settings.

To save the settings, select Options \rightarrow Save to SMS sett., Save to Voice mail, Save to Settings, or Save to e-mail sett..

Receiving service messages

Service messages (network service) are notifications of, for example, news headlines, and they may contain a text message or the address of a browser service. For availability and subscription, contact your service provider.

My folders

 \Leftrightarrow Select **Menu** \rightarrow $Messaging \rightarrow My$ folders.

In My folders, you can organise your messages into folders, create new folders, and rename and delete folders.

Mailbox

⇔ Select **Menu** → $Messaging \rightarrow Mailbox.$

· retrieve new e-mail headings or messages, or

view your previously retrieved e-mail headings or messages offline.

When you scroll to your mailbox and press the joystick, the phone asks you if you want to Connect to mailbox? Select Yes to connect to your mailbox or No to view previously retrieved e-mail messages offline.

Another way to start a connection is to select **Options** \rightarrow *Connect*.

If you select *New message* → Create: \rightarrow E-mail or Mailbox in the Messaging main view and you have not set up your e-mail account, you are prompted to do so. See "Settings for e-mail" on page 52.

When you create a new mailbox, the name you give to the mailbox automatically replaces Mailbox in the Messaging main view. You can have several mailboxes (max. six).

When you are online, select **Options** → Disconnect to end the data call or GPRS connection to the remote mailbox.

Retrieving e-mail messages from the mailbox

 \Longrightarrow Select **Options** \Longrightarrow *Connect*.

This starts a connection to a remote mailbox.

- 1. When you have an open connection to a remote mailbox, select **Options** \rightarrow *Retrieve e-mail*
 - New To retrieve all new e-mail messages to your phone.
 - *Selected* To retrieve only the e-mail messages that have been marked. Use the **Options** → *Mark/Unmark* commands to select messages one by one. See "Actions common to all applications" on page 8.
 - All To retrieve all messages from the mailbox.

To cancel retrieving, press Cancel.

- 2. After you have retrieved the e-mail messages, you can continue viewing them online. Select **Options** → *Disconnect* to close the connection and to view the e-mail messages offline.
- 3. To open an e-mail message, scroll to the e-mail you want to view and press the joystick. If the e-mail message has not been retrieved (arrow in the icon is pointing outwards) and you are offline and select **Options** → *Open*, you are asked if you want to retrieve this message from the mailbox.

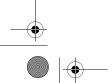

• To view e-mail attachments, open a message that has the attachment indicator 🗓 and select **Options** \rightarrow Attachments. In the Attachments view, you can retrieve, open, or save attachments, in supported formats. You can also send attachments via infrared or Bluetooth technology. If your mailbox uses the IMAP4 protocol, you can decide whether to retrieve e-mail headings only, messages only, or messages and attachments. With the POP3 protocol, the options are e-mail headings only or messages and attachments. See "E-mail messages" on page 60.

Important: Exercise caution opening messages. Messages may contain malicious software or otherwise be harmful to your device or PC.

Deleting e-mail messages

• To delete an e-mail from the phone while still retaining it in the remote mailbox:

Select **Options** \rightarrow *Delete* \rightarrow Phone only.

The phone mirrors the e-mail headings in the remote mailbox. So, although you delete the message content, the e-mail heading stays in your phone. To remove the heading as well, delete the e-mail message from your remote mailbox first and then make a connection from your phone to the remote mailbox again to update the status.

To delete an e-mail from both the phone and the remote mailbox:

Select **Options** \rightarrow *Delete* \rightarrow Phone and server.

If you are offline, the e-mail is deleted first from your phone. During the next connection to the remote mailbox, it is automatically deleted from the remote mailbox. If you are using the POP3 protocol, messages marked to be deleted are removed only after you have closed the connection to the remote mailbox.

To cancel deleting an e-mail from both the phone and server, scroll to an e-mail that has been marked to be deleted during the next connection, and select **Options** \rightarrow *Undelete*.

Outbox

The Outbox is a temporary storage place for messages that are waiting to be sent.

Status of the messages in the Outbox:

- Sending A connection is being made and the message is being sent.
- Waiting Queued For example, if there are two similar types of messages in the Outbox, one of them waits until the first one is sent.
- Resend at... (time) Sending has failed. The phone tries to send the message again after a time-out period. Press **Options** \rightarrow **Send** if you want to restart the sending immediately.
- **Deferred** You can set documents to be 'on hold' while they are in the Outbox. Scroll to a message that is being sent and select **Options** \rightarrow *Defer sending*.
- Failed The maximum number of sending attempts has been reached. If you were trying to send a text message, open the message and check that the Sending settings are correct.

Note: When sending messages, your device may display the words "Message Sent". This is an indication that the message has been sent by your device to the message centre number programmed into your device. This is not an indication that the message has been received at the intended destination. For more details about messaging services, check with your service provider.

■ Viewing messages on a SIM card

Before you can view SIM messages, you need to copy them to a folder in your phone. See "Actions common to all applications" on page 8.

■ Cell broadcast

\bigoplus Select **Menu** \rightarrow Messaging \rightarrow Options \rightarrow Cell broadcast.

You may be able to receive messages on various topics, such as weather or traffic conditions from your service provider (network service). For available topics and relevant topic numbers, contact your service provider. In the main view, you can see:

• the status of the topic: 📆 - for new, subscribed messages and 🛅 – for new, unsubscribed messages.

Options in Cell broadcast: Open, Subscribe Unsubscribe, Hotmark Remove hotmark, Topic, Settings, Help, and Exit.

• the topic number, topic name, and whether it has been flagged (F) for follow-up. You will be notified when messages belonging to a flagged topic have arrived.

A packet data (GPRS) connection may prevent cell broadcast reception. Contact your network operator for the correct GPRS settings.

⇔ Select **Menu** → **Messaging** → **Options** → **Service command**. Enter and send service requests (also known as USSD commands) such as activation commands, for network services, to your service provider.

Messaging settings

Select Menu → Messaging → $\textbf{Options} \rightarrow \textbf{Settings}.$

Text messages

Select **Text message**. The following list of settings opens:

• Message centres - Lists all the defined message centres.

Options when editing message centre settings: New msg. centre, Edit, Delete, Help, and Exit.

- Msg. centre in use (Message centre in use) - Defines which message centre is used for delivering text messages and smart messages such as picture messages.
- Receive report (delivery report) -When this network service is set to Yes, the status of the sent message (Pending, Failed, Delivered) is shown in the Reports (Network Service).

Receiving a delivery report of a multimedia message that has been sent to an e-mail address might not be possible.

• *Message validity* - If the recipient of a message cannot be reached within the validity period, the message is removed from the message service centre. Note that the network must support this feature. Maximum time is the maximum amount of time allowed by the network for which the message remains valid.

- Message sent as The options are Text, Fax, Paging, and E-mail. For further information, contact your network operator.
- Preferred connection You can send text messages via the normal GSM network or via GPRS, if supported by the network.
- Reply via same ctr.(network service) - By setting this option to Yes, if the recipient replies to your message, the return message is sent using the same message service centre number. Note that not all network services provide this option. For availability, contact your network operator or service provider.

Multimedia messages

- Select **Multimedia message**. The following list of settings opens:
- Access point in use (Must be defined) - Select which access point is used as the preferred connection for the multimedia message centre. See "Settings for multimedia" on page 52.

If you receive multimedia message settings in a smart message and save them, the received settings are automatically used for the Access point. See "Receiving smart messages" on page 53.

- Multimedia reception Select:
 - Only in home net. To receive multimedia messages only when you are in your home network. When you are outside your home network, multimedia message reception is turned off.
 - *Always on* To accept always the reception of multimedia messages.
 - Off Not to receive multimedia messages or advertisements at all.
- On receiving msg. Select:
 - Retr. immediately To let the phone try to retrieve multimedia messages instantly. If there are messages with Deferred status, they are retrieved as well.
 - *Defer retrieval* To let the multimedia messaging centre save the message to be retrieved later. To retrieve the message, set *On receiving* msg. to Retr. immediately.
 - Reject message To reject multimedia messages. The multimedia message centre deletes the messages.

- Allow anon. messages Select No to reject messages coming from an anonymous sender.
- Receive adverts Define whether you want to allow reception of multimedia message advertisements or not.
- Reports Set to Yes, if you want the status of the sent message (Pending, Failed, Delivered) to be shown in the Reports.
- Deny report sending Choose Yes, if you do not want your phone to send delivery reports of received multimedia messages.
- Message validity (network service) - If the recipient of a message cannot be reached within the validity period, the message is removed from the multimedia message centre. Maximum time is the maximum amount of time allowed by the network for which the message remains valid.
- Image size Define the size of the image in a multimedia message. The options are: Small (max. of 160x120 pixels) and Large (max. 640x480 pixels).

The default setting of the multimedia message service is generally on.

The appearance of a multimedia message may vary depending on the receiving device.

E-mail messages

Open *Mailbox in use* to select which mailbox you want to use.

Settings for Mailboxes

Options when editing e-mail settings: *Editing options*, *New mailbox*, *Delete*, *Help*, and *Exit*.

Select *Mailboxes* to open a list of defined mailboxes. If no mailboxes have been defined, you are prompted to do so. The following list of settings is shown (this information is available from your e-mail service provider):

- Mailbox name Write a descriptive name for the mailbox.
- Access point in use (Must be defined) - The Internet Access Point (IAP) used for the mailbox. Choose an IAP from the list. See "Connection settings" on page 82.
- My e-mail address (Must be defined) - Write the e-mail address given to you by your service provider. The address must contain the @ character. Replies to your messages are sent to this address.

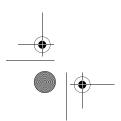

- Send message (network service) -Define how e-mail is sent from your phone. Immediately - The phone tries to connect to the mailbox immediately after you have selected Send. During next conn. - E-mail is sent the next time you connect to your remote mailbox.
- Send copy to self Select Yes to save a copy of the e-mail to your remote mailbox and to the address defined in My e-mail
- Include signature Select Yes to attach a signature to your e-mail messages and to start to write or edit a signature text.
- *User name:* Write your user name, provided by your service provider.
- Password: Write your password. For increasing security, you can leave this field blank, so that every time you try to connect to your remote mailbox, you are prompted for the password Otherwise the password is sent automatically.

- Incoming mail server: (Must be defined) - The IP address or host name of the computer that receives your e-mail.
- Mailbox type: Defines the e-mail protocol your remote mailbox service provider recommends. The options are POP3 and IMAP4.

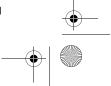

This setting can be selected only once and cannot be changed if you have saved or exited from the mailbox settings.

- Security Used with the POP3, IMAP4, and SMTP protocols to secure the connection to the remote mailbox.
- APOP secure login Used with the POP3 protocol to encrypt the sending of passwords to the remote e-mail server. Not shown if IMAP4 is selected for *Mailbox* type:.
- Retrieve attachments (not shown if the e-mail protocol is set to POP3) - To retrieve e-mail with or without attachments.
- Retrieve headers To limit the number of e-mail headers you want to retrieve to your phone. The options are All and User defined. Used with the IMAP4 protocol only.

Service messages

- Select **Service message**. The following list of settings opens:
- Service messages Choose whether or not you want to allow reception of service messages.
- **Download messages** Choose to download messages automatically or after your agreement.

Cell broadcast

Check with your service provider whether Cell broadcast (network service) is available and what the available topics and related topic numbers are.

- Select **Cell broadcast** to change the settings:
- Reception On or Off.
- Language All allows you to receive cell broadcast messages in every possible language. Selected allows you to choose in which languages you wish to receive cell broadcast messages. If the language you prefer could not be found in the list, select Other.

Topic detection - If you receive a message that does not belong to any of the existing topics, Topic detection → On allows you to save the topic number automatically. The topic number is saved to the topic list and shown without a name. Choose Off if you do not want to save new topic numbers automatically.

Settings for the Other folder

- Select Other. The following list of settings opens:
- Save sent messages Choose to save a copy of every text message, multimedia message, or e-mail that you have sent to the Sent items folder.
- No. of saved msgs. Define how many sent messages are saved to the Sent items folder at a time. The default limit is 20 messages. When the limit is reached, the oldest message is deleted.

 \Longrightarrow Select **Menu** \Longrightarrow **Chat**.

Options in the Chat main view are: Open, Login, Logout, Settings, Help, and Exit.

62

Chat (network service) allows you to converse with other people using instant messages, and join discussion forums (chat groups) with specific topics. Once you have registered with a chat service, you can log into the service provider's chat server.

Check the availability of chat services, pricing, and tariffs with your network operator and/or service provider. Service providers also give you instructions on how to use their services.

To access a chat service you need to save the settings for that service. You may receive the settings from the network operator or service provider that offers the service. See "Receiving smart messages" on page 53. You can also enter the settings manually. See "Chat and Presence servers" on page 68.

Connecting to a chat server

\hookrightarrow Select Menu \rightarrow Chat.

 The phone automatically tries to connect to a chat server. You can change the chat server to connect to. See "Chat and Presence servers" on page 68. Once the connection has been established, enter your user ID and password and press the joystick, or press Cancel to stay offline. When you are offline, your phone is not connected to the chat server and you cannot send or receive messages. To log in later, select Options → Login. You obtain the user ID and password from your service provider.

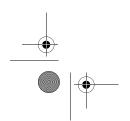

To log out, select **Options** \rightarrow *Logout*.

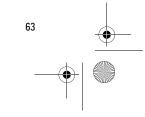

Modifying your chat settings

 \Leftrightarrow Select **Options** \rightarrow *Settings* \rightarrow *Chat settings*.

- Use screen name Select Yes to enter a nickname (max. 10 characters).
- Chat presence Prevent others from seeing if you are online, select Not active.
- Allow messages from Select All, From chat contacts or None.
- Allow invitations from Select All, From chat contacts or None.
- Message speed Select the speed at which new messages are displayed.

- Availability reloading Choose how to update information about whether your chat contacts are online or offline. Select Automatic or Manual.
- Reload availab. for Select All contacts or Selected contacts.

Joining and leaving a chat group

 \Longrightarrow Select Menu \Longrightarrow Chat \Longrightarrow Chat groups.

A list of chat groups that you have saved or are currently joined to is shown. The icon next to a group indicates what type it is:

Options in the Chat groups view are: Open, Join group, Create new group, Leave chat group, Chat group, Search, Settings, Help, and Exit.

- A group that you have created and are currently joined
- A group that you have created but are not currently joined to.
- A group that you have saved and are currently joined to.
- A group that you have saved but are not currently joined to.

• 3 - A group that you are

To join a chat group: Scroll to a group on the list and press the joystick. To join a chat group not on the list but for which you know the group ID, select **Options** \rightarrow *Join* group. Enter the group ID and press the joystick.

You can scroll to a group, select **Options** → *Chat group* and then select: Save group, Delete, View members to see which members are currently joined to the group, Chat group details to see the group ID, topic, members, editing rights in the group, and whether sending private messages is allowed in the group, and Chat group settings to view and edit the chat group's settings. See "Editing chat group settings" on page 68.

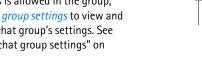

To leave the chat group: Select **Options** \rightarrow *Leave chat group.*

Searching for chat groups and users

 \hookrightarrow Select **Chat groups** \rightarrow **Options** \rightarrow Search \rightarrow Groups or Users.

You can search for **Groups** by Group name, Topic, and Members (user ID). For groups that you have found you can select New search, Join and Save group.

You can search for Users by User's name, User ID, Phone number, and E-mail address. For users that you have found you can select New search, Open conversation, Add to Chat contact to save the contact, Send invitation, and Add to blocked list to block (or unblock) messages from the contact.

When the search result is displayed, you can select **Options** $\rightarrow New$ search, More results from the same search, and *Previous results* to see your previous search result.

Chatting in a chat group

 \hookrightarrow Select Menu \rightarrow Chat \rightarrow Chat groups.

Once you have joined a chat group, you can view the messages that are exchanged in the group, and send your own messages.

Options while chatting: Send, Send private msg., Reply, Send invitation, Leave chat group, Save group, Record convers. Stop recording, Help, and Exit.

- To send a message, write the message and press the joystick.
- To send a private message to a member (if allowed in the group), select **Options** → *Send private* msg., select the recipient, write

the message, and press the joystick.

To reply to a private message sent to you, select **Options** \rightarrow *Reply*.

To invite chat contacts who are online to join the chat group (if allowed in the group), select **Options** → *Send invitation*, select the contacts you want to invite, write the invitation message, and press Done.

Recording messages

To record the messages that are exchanged in a chat group or during an individual conversation, select **Options** \rightarrow *Record convers.*. Enter the name for the message file and press the joystick. To stop recording, select **Options** \rightarrow *Stop recording*.

The recorded message files are saved to Notes. See "Notes" on page 91.

Blocking messages

To prevent receiving messages from certain chat users, select $\mathbf{Options} \rightarrow$ **Blocking options** and then select:

- Add to blocked list To block messages from the currently selected user.
- Add ID to list manually Enter the user ID of the user and press the joystick.

65

Unblock - Select the user that you want to remove from the blocked list and press the joystick.

Starting and viewing individual conversations

 \Longrightarrow Select **Menu** \Longrightarrow **Chat** \Longrightarrow Conversations.

This shows a list of the chat users with whom you have an ongoing conversation.

Options in the Conversations view are: Send, Add to chat contact, Forward, Record convers. | Stop recording, Blocking options, End conversation, Help, and Exit.

To start a new conversation, select **Options** → *New conversation* and then select:

- Select recipient To see a list of your saved chat contacts that are currently online. Scroll to the contact and press the joystick.
- Enter user ID Enter the user ID and press the joystick. The user ID is provided by the service provider to those who register to the service.

To view an ongoing conversation, scroll to the user and press the joystick. To continue the conversation, write your message and press the joystick. To return to the conversations list without closing the conversation, press Back.

To close the conversation, select **Options** \rightarrow *End conversation*.

Icon: next to a user indicates that you have received a new message from that user.

Ongoing conversations are automatically closed when you exit Chat.

To save a user to your chat contacts, scroll to the user and select Options \rightarrow Add to Chat contact.

To send automatic replies to incoming messages, select Options \rightarrow *Set auto reply on.* Enter the text and press Done.

Chat contacts

 \hookrightarrow Select Menu \rightarrow Chat \rightarrow Chat contacts.

Options in the Chat contacts view are: Open, Open conversation, Switch tracking on, Belongs to groups, New Chat contact, Edit, Delete, Reload user availab. Blocking options, Search, Settings, Help, and Exit.

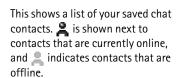

To create a new contact, select

Options → New chat contact. Fill in
the Name and User ID fields and
press Done.

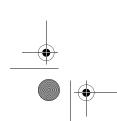

You can scroll to a contact and press the joystick to view contact details. Press **Options** and select:

- Edit Edit the contact's details.
- Open conversation Start a new conversation or continue an ongoing conversation with the contact.
- Switch tracking on Be notified every time the chat contact goes online or offline.
- Belongs to groups See which groups the chat contact has joined.
- Reload user availab. Update
 information about whether
 contacts are online or offline.
 This option is not available if you
 have set the Availability
 reloading to Automatic in Chat
 settings.

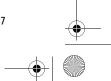

Creating a new chat group

- Select Chat groups → Options → Create new group. Enter the settings for the group:
- Group name, Group topic, and a Welcome note that the participants see when they join the group.
- Group size Maximum number of members allowed to join the group.
- Allow search Define if others can find the chat group by searching.
- Editing rights Scroll to the chat group members to whom you want to give editing rights and permission to invite contacts to join the group.
- Group members See
 "Restricting access to a chat group" on page 68.
- Banned Displays a list of banned users.
- Allow private msgs. Allow or prevent private messaging between members.
- Group ID Is created automatically and cannot be changed.

Editing chat group settings

\hookrightarrow Select Menu \rightarrow Chat \rightarrow Chat groups.

You can edit the settings for a chat group if you have created the group or if the creator of the group has given you editing rights. In the **Chat** groups view, scroll to the desired group and select **Options** → *Chat group* → *Chat group settings.* See "Creating a new chat group" on page 67.

Restricting access to a chat

You can make a chat group closed by creating a Group members list. Only the users on the list are allowed to join the group. Select the Chat groups view, scroll to the group and select **Options** \rightarrow *Chat group* \rightarrow Chat group settings \rightarrow Group $members \rightarrow Selected only.$

- To add a user to the list, select Add and Chat contact or Enter user ID.
- To remove a user from the list, scroll to the user and select Remove.
- To clear the list and allow all chat users to join the group again select Remove all.

Chat and Presence servers

- \Longrightarrow Select **Options** \Longrightarrow **Settings** \Longrightarrow **Server settings**. You may receive the settings as a smart message from the service provider that offers the chat service.
- To change the chat or presence server you wish to connect to, select Default server.
- To change the Presence login type, select *Login type* and select Automatic, Aut. in home net., or Manual.
- To change the Chat login type, select *Login type* and select Automatic or Manual.
- To add a new server, select **Options** → *New server*. Enter or select the settings: Server name and Access point in use to connect to the server, Web address of the chat server, your User ID and login Password. See "Connection settings" on page

You obtain the user ID and password from your service provider when you register for the service. If you do not know your user ID or password, contact your service provider.

8. Tools

Applications

You can install new compatible Symbian operating system applications (SIS files) and Java™ applications (Java MIDlets and MIDlet suites) on your phone. You can also update and uninstall applications from the phone, and monitor the installation history.

Your phone supports J2ME[™]Java applications. Do not download PersonalJava[™] applications to your phone as they cannot be installed.

Options in the Application manager main view are: Install, View details, View certificate, Update, Go to web address, Remove, View log, Send log, Settings, App. downloads, Help, and Exit.

Applications in the Application manager use shared memory. See "Shared memory" on page ix.

When you open the Application manager, you can see a list of:

 Applications saved in the Application manager.

- Partially installed applications (indicated by
- Fully installed applications that you can remove (indicated by
 1).

You can only use Symbian operating system applications with a .SIS extension.

Leaving applications run in the background increases the demand on battery power and reduces the battery life.

Downloading an application

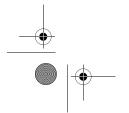

Your phone supports J2ME™ Java applications. Make sure that the application is compatible with your phone before downloading it. You can download new Java applications in different ways:

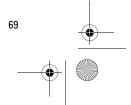

Select Menu → Tools →
Manager and then Options →
App. downloads and the list of
available bookmarks is shown.

Select the appropriate bookmark to connect to the desired page. If the connection fails, you may not be able to access the page from the service whose connection settings are currently active. In this case, enter the *Web* menu

and activate another set of service settings. See "Making a connection" on page 101. Try again to connect to the page. For the availability of different services, pricing and tariffs, contact your network operator and/or the service provider.

- Select Menu \rightarrow Web \rightarrow Download. Select to download an appropriate application or game.
- Use the Nokia Application installer from PC Suite to download the applications to your phone.

Important: Only install and use applications and other software from sources that offer adequate security and protection against harmful software.

Note that when downloading an application, it may be saved in the Games menu instead of the Web menu.

Installing an application

You can install applications that are specifically intended for this phone and suitable for the Symbian operating system.

If you install an application that is not intended specifically for this phone, it may function and look different from what was originally intended.

- Open the Application manager, scroll to the application, and select **Options** → *Install* to start the installation.
- Alternatively, search the phone memory or the memory card, select the application, and press the joystick to start the installation.

Applications may be downloaded to your phone during browsing, received as attachments in multimedia messages or e-mails, or received via infrared or Bluetooth technology from another device, for example, a phone or a compatible PC.

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

To increase protection, the application installation system uses digital signatures and certificates for applications. Do not install the application if the Application manager gives a security warning during installation.

•

If you install an application that contains an update or repair to an existing application, you can only restore the original application if you have the original application or a full backup copy of the removed application. To restore the original application, first remove the updated or repaired application and then re-install it from the original application or the backup copy. During installation, the phone checks the integrity of the application to be installed. The phone shows information about the checks being carried out and you are given options whether to continue or cancel the installation. Once the phone has checked the integrity of the application, it is installed on your phone.

Installing a Java™application

The .JAR file is required for installation. If it is missing, the phone may ask you to download it. If there is no access point defined for the Application manager, you are asked to select one. When downloading the .JAR file, you may need to enter a user name and password to access the server. You obtain these from the supplier or manufacturer of the application.

- To start a data connection and to view extra information about the application, scroll to it and select Options → Go to web address.
- To start a data connection and to check if there is an update available for the application, scroll to it and select **Options** → *Update*.

Java settings

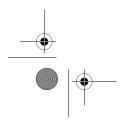

- To change the default access point that a Java application uses for downloading extra data, select **Options** → *Settings* → *Access point*. See "Access points" on page 82.
- To change the security settings that determine the actions that a Java application is permitted to perform, select **Options** → Settings.

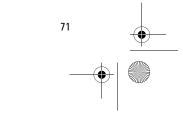

Not all Java applications permit you to change the security settings.

Launching an application

- Select Menu → Web → Applications → Select application:.
- 2. Scroll to an application or an application set (the name depends on the application).

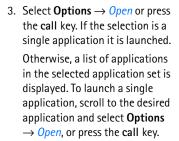

Note that running some applications may consume the phone's battery faster (and you may need to connect the phone to the charger).

Other options available for an application or application set

- Delete Delete the application or application set from the phone.
- **Application access** Restrict the application from accessing the network. Select Ask first and the phone asks for net access, Always allowed to allow the net access, or Not allowed not to allow the net access.
- **Update** Check if a new version of the application is available for download from the services (network service).
- Go to web address Provide further information or additional data for the application from an Internet page. This feature needs to be supported by the network. It is only shown if an Internet

- address has been provided with the application.
- **Details** Give additional information about the application.

Memory status for applications

igoplus Select Menu o Extras oMemory.

This shows the amount of memory available for game and application

The applications use shared memory. See "Shared memory" on page ix.

Removing an application

- 1. To remove an application, scroll to it and select **Options** \rightarrow Remove.
- 2. Press Yes to confirm the removal.

If you remove an application, you can only re-install it if you have the original application or a full backup of the removed application. If you remove an application, you may no longer be able to open documents created with that application. If another application depends on the application that you removed, the other application may stop working. Refer to the documentation of the installed application for details.

installations.

File manager

Select Menu \rightarrow Tools \rightarrow File manager.

In the File manager, you can browse, open, and manage files and folders in the phone memory or on the memory card, if you use one.

Options in the File manager main view are: Open, Send, Delete, Move to folder, Copy to folder, New folder, Mark/Unmark, Rename, Find, Receive via infrared, View details, Memory details, Help, and Exit.

Open the File manager to see a list of the folders in the phone memory. Move the joystick to the right to see the folders on the memory card, if you use one.

You can browse, open, and create folders, mark, copy and move items to folders. See "Actions common to all applications" on page 8.

Copyright protections may prevent some images, ringing tones, and other content from being copied, modified, transferred or forwarded.

Receiving files via Infrared

 \Longrightarrow Select **Options** \rightarrow *Receive via* infrared.

Files are automatically received into the root level of the folder structure and can be moved or copied to other folders. See "Infrared connection" on page 111.

Viewing memory consumption

 \Leftrightarrow Select **Options** \rightarrow *Memory details*.

If you have a memory card installed in your phone, you have a choice of two memory views, one for the phone memory and one for the memory card.

Move the joystick to the right or to the left to move from one memory tab to another.

To check memory consumption of the current memory select **Options** → *Memory details*.

The phone calculates the approximate amount of free memory for storing data and installing new applications.

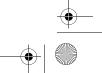

In the memory views, you can view the memory consumption of the different data groups: Calendar, Contacts, Documents, Images, Sound files, Video clips, Messages, Applications, Mem. in use, and Free memory.

If the phone memory is getting low, remove some files, or move them to the memory card. See "Troubleshooting" on page 116.

You can use Voice commands to start applications and profiles, and to dial numbers from Contacts, without having to look at your phone's display. You record a word, or words (voice command) and then pronounce this voice command to open an application, activate a profile, or dial a number.

You can have only one voice command per item.

Options in the Voice commands main view are: Add voice command, Open, New application, Playback, Change, Delete, Delete all, Help, and Exit.

Any spoken word(s) can be a voice command.

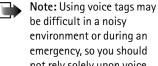

• When recording, hold the phone at a short distance away from your mouth. After the starting tone, clearly pronounce the word, or words, you want to record as a voice command.

Before using voice tags, note that:

 Voice tags are not language-dependent. They are dependent on the speaker's voice.

- Voice tags are sensitive to background noise. Record voice tags and use them in a quiet environment.
- Very short names are not accepted. Use long names and avoid similar names for different numbers.

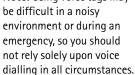

Adding a voice command to an application

1. In the Voice commands main view, scroll to the application that you want to add a voice command to, and select Options \rightarrow Add voice tag.

To add a voice command to a profile, the Profiles folder must be opened and a specific profile selected.

To add an application to the list of applications in the Voice commands main view, select Options \rightarrow *New application*, scroll to the application that you want to add and press Select.

- 2. The text Press 'Start', then speak after tone is displayed.
 - Press **Start** to record a voice command. The phone sounds a starting tone and the note Speak now is displayed.
- 3. Pronounce the voice command. The phone stops recording after approximately 5 seconds.
- 4. After recording, the phone plays the recorded command and the note *Playing voice command* is displayed. If you do not want to save the recording, press Quit.
- 5. When the voice command has been successfully saved, the note Voice command saved is displayed and a beep sounds. A symbol ② can be seen next to the application.

Starting an application using a voice command

- 1. In standby mode, press and hold the right selection key. A short tone is played and the note Speak now is displayed.
- 2. When you are starting an application by saying a voice command, hold the phone a short distance away from your mouth and pronounce the voice command clearly.

3. The phone plays the original voice command and starts the application. If the phone plays an incorrect voice command, press Retry.

Replaying, erasing, or changing a voice command

To replay, erase, or change a voice command, scroll to the item that has a voice command (indicated by €), select **Options**, and then either:

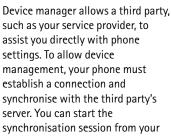

- Playback Listen to the voice command again.
- Change Record a new voice command. Press Start to record.
- Delete Erase the voice command.

Device manager

igoplus Select Menu o Tools o Device mgr..

such as your service provider, to assist you directly with phone settings. To allow device management, your phone must establish a connection and synchronise with the third party's server. You can start the synchronisation session from your phone, and you can accept or reject server-initiated synchronisation attempts.

Options in the Device manager main view are: Start configuration, New server profile, Edit profile, Delete, Enable config. I Disable config., View log, Help, and Exit

This feature is operator dependent and may not be available on all phones. Contact your service provider for information and availability.

A device manager profile must be defined before you can connect to a server. The third party who is assisting you can help define the profile settings:

- Server name Display name of the server.
- Server ID Remote device manager server ID.
- Server password Password used in server alerts. Enter the password that must be provided by the device manager server when synchronising with your phone.
- Access point Internet access point your phone uses to establish the server connection. Choose from the list of access points defined in your phone.

- Host address Device management server URL.
- Port Device management server port.
- *User name* Your user name for this profile.
- *Password* Your password for this profile.
- Allow configuration Device management allowed on this server. Select Yes or No.
- Auto-accept all regs. Automatic or approved device management on this server. Select Yes to allow synchronisation without your verification, or select No to verify each synchronisation attempt.

9. Personalising your phone

⇔ Select **Menu** → Profiles.

Options in the Profiles main view are: Activate, Personalise, Create new, Delete profile, Help, and

In Profiles, you can adjust and customise the phone tones for different events, environments, or caller groups. You can see the currently selected profile at the top of the display in standby mode. If the General profile is in use, only the current date is shown.

To change the profile, scroll to a profile and select **Options** \rightarrow Activate.

To modify a profile, scroll to the profile in the Profiles list and select **Options** \rightarrow *Personalise*. To create a new profile, select **Options** \rightarrow *Create new.* A list of profile settings opens. Scroll to the setting you want to change and press the joystick to open the choices:

Ringing tone - Set the ringing tone for voice calls, choose a ringing tone from the list. Press any key to stop the sound. If a memory card is used, tones

stored on it have the 📋 icon next to the tone name. Ringing tones use shared memory. See "Shared memory" on page ix. You can also change ringing tones in Contacts. See "Adding a ringing tone" on page 25.

- Ringing type When Ascending is selected, the ringing volume starts from level one and increases level by level to the set volume level.
- *Ringing volume* Set the volume level for the ringing and message alert tones.
- *Message alert tone* Set the tone for messages.
- Chat alert tone Set the tone for instant messages.
- *Vibrating alert* Set the phone to vibrate at incoming voice calls and messages.
- Keypad tones Set the volume level for keypad tones.
- Warning tones The phone sounds a warning tone, for example, when the battery is running low.

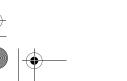

Personalising your phone

Alert for - Set the phone to ring only upon calls from phone numbers that belong to a selected contact group. Phone calls coming from people outside the selected group have a silent alert. The choices are All calls or (a list of contact groups, if you have created them).

Themes

Options in the Themes main view are: Preview, Apply, Edit, Theme downloads, Help, and Exit.

You can change the look of your phone's display by activating a theme. A theme can include the idle screen wallpaper, colour palette, screen saver, and background image in 'Go to'. Edit a theme for more detailed personalisation.

When you open Themes you see a list of the available themes. The currently active theme is indicated by a check mark. Move the joystick to the right to see the themes on the memory card, if you use one.

To preview a theme, scroll to the theme and select **Options** \rightarrow **Preview** to view the theme. Press Apply to activate the theme. You can activate the theme without

previewing it by selecting **Options**

Group together elements from other themes, or images from the Gallery to personalise themes further.

Editing a theme:

- 1. Scroll to a theme, select **Options** \rightarrow *Edit*, and select:
 - Wallpaper Select an image from one of the available themes, or select your own image from the Gallery, to use as a background image in standby mode.
 - Colour palette Change the colour palette used on the display.
 - Screen saver Select what is shown on the screen saver bar: the time and date or a text that you have written yourself. The location and background colour of the screen saver bar changes in 1-minute intervals. Also, the screen saver changes to indicate the number of new messages or missed calls. You can set the time that elapses before the screen saver is activated. See "Phone settings" on page 79.

78

Image in 'Go to' - Select an image from one of the available themes, or select your own image from the Gallery, to use as a background image in Go to.

open a slider view and move the joystick to the right or to the left to increase or

2. Scroll to the element to be edited and select **Options** \rightarrow *Change*.

You may be able to receive some settings from your service provider in a short message. See "Receiving smart messages" on page 53.

3. Select **Options** \rightarrow **Set** to select the current setting. To preview the selected element, select **Options** \rightarrow *Preview*. Note that

you cannot preview all elements. General

Select **Phone**.

To restore the currently selected theme to its original settings, select **Options** \rightarrow *Restore orig. theme* when editing a theme.

• Phone language - Change the language for the display texts in your phone. This change may also affect the format used for date and time and the separators used, for example, in calculations. If you select *Automatic*, the phone selects the language according to the information on your SIM card. After you have changed the display text language, you must restart the phone.

Settings

Changing the settings for *Phone* language or Writing language affects every application in your phone and the change remains effective until you change these settings again.

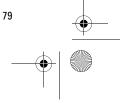

- 1. Scroll to a setting group and
- press the joystick to open it. 2. Scroll to a setting you want to change and press the joystick to:
 - switch between options if there are only two (On/Off),
 - open a list of options or an editor,

decrease the value respectively.

- Writing language Change the writing language of your phone. Changing the language affects:
 - the characters available when you press any key 1 key 9
 - the predictive text dictionary used
 - the special characters that are available when you press the . key and key 1.
- Dictionary Set predictive text input On or Off for all editors in the phone. Select a language for entering predictive text from the list available. You can also change this setting when you are in an editor. Press the # key and select Dictionary → Dictionary on or Off.
- Welcome note or logo The
 welcome note or logo is displayed
 briefly each time you switch on
 the phone. Select *Default* if you
 want to use the default image or
 animation. Select *Text* to write a
 welcome note (max. 50 letters).
 Select *Image* to select a photo or
 picture from the Gallery.

• Orig. phone settings - Reset some of the settings to their original values. To do this, you need the lock code. See "Security" on page 86. After resetting the settings, the phone may take a longer time to power up. All documents and files that you have created are left as they are.

Standby mode

Left selection key and Right selection key - Change the shortcuts that appear over the left — and right — selection keys in standby mode. In addition to the applications, you can have the shortcut point to a function, for example, New message.

You can only have shortcuts to pre-installed applications and functions.

Display

- Brightness Adjust the brightness of the display.
- Screen saver timeout The screen saver is activated when the screen saver time-out period is over. When the screen saver is active, the display is cleared and you can see the screen saver bar.
 - To deactivate the screen saver press any key.

Call settings

Send my caller ID (network service)

• Set your phone number to be displayed (Yes) or hidden (No) from the person whom you are calling. Or, the value may be set by your network operator or service provider when you make a subscription.

Call waiting (network service)

• The network notifies you of a new incoming call while you have a call in progress. Select *Activate* to request the network to activate call waiting, Cancel to request the network to deactivate call waiting, or Check status to check if the function is active or not.

Automatic redial

When this setting is activated, your phone makes a maximum of ten attempts to connect the call after an unsuccessful call attempt. Press the end key to stop automatic redialling.

Summary after call

• Activate this setting if you want the phone to briefly display the approximate duration of the last call.

Speed dialling

• Select *On*, and the numbers assigned to the speed-dialling keys (2 - 9) can be dialled by pressing and holding the key. See "Assigning speed-dialling keys" on page 26.

Personalising your phone

Anykey answer

• Select *On*, and you can answer an incoming call by briefly pressing any key, except the right selection key ---, the power key, and the end key.

Line in use (network service)

This setting is shown only if the SIM card supports two subscriber numbers, that is, two phone lines. Select which phone line (Line 1 or Line 2) you want to use for making calls and sending short messages. Calls on both lines can be answered irrespective of the selected line.

Note: You cannot make calls if you select Line 2 and have not subscribed to this network service.

To prevent line selection, select *Line change* → *Disable* if supported by your SIM card. To change this setting, you need the PIN2 code.

Personalising your phone

Connection settings

Select Connection settings.

Access points

Here you can see a short explanation for every setting that may be needed for different data connections and access points. If you have not yet used your phone to make a WAP connection, you may need to contact your service provider for assistance with the first-time connection.

Many service providers require you to use an IAP for your default access point. Other service providers allow you to use a WAP access point. Contact your service provider for more information.

Start to fill in the settings from the top since, depending on the data connection you select (Data bearer), only certain fields are available.

- Connection name Give a descriptive name for the connection.
- Data bearer The options are GPRS, Data call or High speed (GSM). Depending on what data connection you select, only certain setting fields are available. Fill in all fields marked with Must be defined, or with an asterisk. Other fields can be left empty, unless you have been

instructed otherwise by your service provider.

To be able to use a data connection, the network operator or service provider must support this feature, and if necessary, activate it for your

- Access point name (for packet data only) - The access point name is needed to establish a connection to the GPRS network. You obtain the access point name from your network operator or service provider.
- *Dial-up number* The modem telephone number of the access point.
- User name Write a user name if required by the service provider. The user name may be needed to make a data connection, and is usually provided by the service provider. The user name is often case-sensitive.
- *Prompt password* If you must enter a new password every time you log onto a server, or if you do not want to save your password to the phone, choose Yes.

 Password – A password may be needed to make a data connection, and is usually provided by the service provider. The password is often case-sensitive. When you are writing the password, the characters you enter are shown briefly and then changed to asterisks (.). The easiest way to enter numbers is to press and hold the digit you want to enter, and then continue entering letters.

- Authentication Normal Secure.
- Homepage Depending on what you are setting up, enter either:
 - the service address, or
 - the address of the multimedia messaging centre.
- Data call type Analogue, ISDN v.110, or ISDN v.120 defines whether the phone uses an analogue or digital connection. This setting depends on both your GSM network operator and Internet Service Provider (ISP), because some GSM networks do not support certain types of ISDN connections. For details, contact your ISP. If ISDN connections are available, they establish connections more quickly than analogue methods.

Personalising your phone

Maximum data speed - The
 options are Automatic, 9600,
 14400, 19200, 28800, 38400or
 43200, depending on the chosen
 Data call type. This option allows
 you to limit the maximum
 connection speed when GSM
 data are used. Higher data rates
 may cost more, depending on the
 service provider.

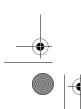

The speeds above represent the maximum speed at which your connection operates. During the connection, the operating speed may be less, depending on network conditions.

Options → **Advanced settings**

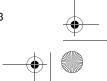

- Phone IP address The IP address of your phone.
- Primary name server The IP address of the primary DNS servers.
- Second. name server The IP address of the secondary DNS servers.
- Proxy serv. address The IP address of the proxy server.
- Proxy port number The port number of the proxy server.

To enter these settings, contact your Internet service provider.

The following settings are shown if you have selected data call as the connection type:

 Use callback - This option allows a server to call you back once you have made the initial call.
 Contact your service provider to subscribe to this service.

The phone expects the callback call to use the same data call settings that were used in the callback-requesting call. The network must support that type of call in both directions, to and from the phone.

- Callback type The options are Use server no. | Use other no.. Ask your service provider for the correct setting to use.
- Callback number Enter your phone's data phone number which the dial-back server uses. Usually, this number is the data-call phone number of your phone.
- Use PPP compression When set to Yes, this option speeds up data transfer, if supported by the remote PPP server. If you have problems with establishing a connection, try setting this to No. Contact your service provider for guidance.

- Login script Insert the login script.
- Modem initialisation (Modem initialisation string) - Controls your phone using modem AT commands. If required, enter characters specified by your service provider or Internet service provider.

GPRS

Select GPRS.

The GPRS settings affect all access points using a packet data connection.

GPRS connection – If you select When available and you are in a network that supports packet data, the phone registers to the GPRS network and short messages are sent via GPRS. Also, starting an active packet data connection, for example, to send and receive e-mail, is quicker. If you select When needed, the phone uses a packet data connection only if you start an application or action that needs it. The GPRS connection can be closed when it is not needed by any application.

If there is no GPRS coverage and you have chosen *When available*, the phone periodically tries to establish a packet data connection.

Access point - The access point name is needed when you want to use your phone as a packet data modem to your computer.

Data call

Select Data call.

The *Data call* settings affect all access points that use a GSM data call.

Online time - If there are no actions the data call is dropped automatically after a time-out period. In **Options** → Change select User defined to enter a time, or Unlimited.

Date and time

The *Date and time* settings allow you to define the date and time used in your phone, as well as change the date and time format and separators.

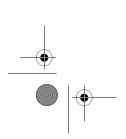

• *Time* and *Date* – to set the time and date.

Personalising your phone

- Date format to choose between European, US and Japanese format.
- Date separator to choose between several separators.
- Time format to choose between 24-hour and 12-hour time format.
- Time separator to choose between several separators.
- Clock type → Analogue or Digital

 To change the clock shown in standby mode. See "Clock" on page 93.
- Clock alarm tone To change the tone played when the clock alarm time is reached.
- Auto time update To allow the network to update time, date, and time zone information to your phone (network service). For the Auto time update setting to take effect, the phone needs to be restarted. Check any alarms as these may be affected by Auto time update.
- *GMT offset* To change the time zone for the clock time.
- Daylight-saving To turn daylight saving time on or off.

Personalising your phone

Security

You can change the following codes: lock code, PIN code, and PIN2 code. These codes can only include the numbers from 0 to 9.

Avoid using access codes similar to emergency numbers, such as 112, to prevent accidental dialling of the emergency number.

PIN code request - When the PIN code request is active, the code is requested each time the phone is switched on. Note that some SIM cards may not allow the PIN code request to be deactivated.

PIN code PIN2 code Lock code -Open this setting if you want to change the code.

Autolock period - You can set an autolock period, a time-out after which the phone is automatically locked and can be used only if the correct lock code is entered. Enter a number for the time-out in minutes or select *None* to turn off the autolock period.

• To unlock the phone, enter the lock code.

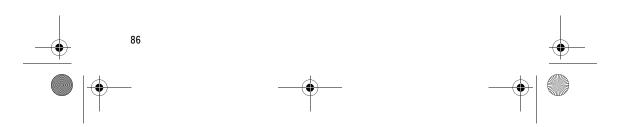

Lock if SIM changed - Select Yes if

you want the phone to prompt for the lock code when an unknown, new SIM card is inserted into your phone. The phone maintains a list of SIM cards that are recognised as the owner's cards.

Options in the Fixed dialling view are: Open, Call, Activ. fixed dialling, Deact. fixed dialling, New contact, Edit, Delete, Add to Contacts, Add from Contacts, Find, Mark/Unmark, Help, and Exit.

Fixed dialling - You can restrict your outgoing calls to selected phone numbers, if supported by your SIM card. You need the PIN2 code for this function. When this function is active, you can only call those phone numbers that are included in the fixed-dialling list or which begin with the same digit(s) as a phone number on the list.

- Press the joystick to set *Fixed* dialling on.
- To add new numbers to the Fixed dialling list, select **Options** \rightarrow New contact or Add from Contacts.

- Αι

Closed user group (network service) – You can specify a group of people whom you can call and who can call you. For more information, contact your network operator or service provider. Select: Default to activate the default group agreed on with the network operator, On if you want to use another group (you need to know the group index number), or Off.

When security features that restrict calls are in use (such as call barring, closed user group and fixed dialing) calls still may be possible to the official emergency number programmed into your device.

Confirm SIM services (network service) - To set the phone to display confirmation messages when you are using a SIM card service.

Certificate management

Options in the certificate management main view are:
Certificate details, Delete, Trust settings, Mark/Unmark, Help, and Fxit.

In the certificate management main view, you can see a list of authority certificates that have been stored in your phone. Move the joystick to the right to see a list of personal certificates, if available.

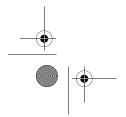

Authority certificates are used by some browser services, such as banking services, for checking signatures or server certificates or other authority certificates.

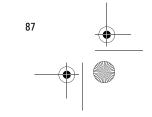

Server certificates are used to improve security in the connection between the phone and the gateway. The phone receives the server certificate from the service provider before the connection is established and its validity is checked using the authority certificates saved in the phone. Server certificates are not saved.

Server certificates may be needed when you, for example:

- want to connect to an online bank or another site or remote server for actions that involve transferring confidential information, or
- want to be sure of the authenticity of software when downloading and installing software.

Important: Note that even if the use of certificates considerably reduces the risks involved in remote connections and software installation, they must be used correctly in order to benefit from increased security. The existence of a certificate does not offer any protection by itself; the certificate manager must contain correct, authentic, or trusted certificates for increased security to be available. Certificates have a restricted lifetime. If Expired certificate or Certificate not valid yet is shown even if the certificate should be valid, check that the current date and time in your device are correct.

Before changing any certificate settings, you must make sure that you actually trust the owner of the certificate and that the certificate really belongs to the listed owner.

Changing the trust settings of an authority certificate

Scroll to an authority certificate and select **Options** \rightarrow *Trust* settings. Depending on the certificate, a list of the applications that can use the

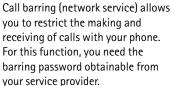

selected certificate is shown. For example:

certificate is able to certify the *Internet/Yes* - The certificate is able to certify e-mail and

Call barring

imaging servers.

- 1. Scroll to one of the barring options.
- 2. Select **Options** \rightarrow *Activate* to request the network to set call restriction on, *Cancel* to set the selected call restriction off, or Check status to check if the calls are barred or not.
- Select **Options** → *Edit barrings* passw. to change the barring password.
- Select **Options** → *Cancel all* barrings to cancel all active call barrings.

Call barring and call diverting cannot be active at the same time.

When calls are barred, calls still may be possible to certain official emergency numbers.

Network

Operator selection

- Automatic Set the phone to automatically search for and select one of the cellular networks available in your area.
- Manual Select the desired network manually from a list of networks. If the connection to the manually selected network is lost, the phone sounds an error tone and asks you to select a network again. The selected network must have a roaming agreement with your home network, that is, the operator whose SIM card is in your phone.

Cell info display

• On - Set the phone to indicate when it is used in a cellular network based on Micro Cellular Network (MCN) technology and to activate cell info reception (network service).

Personalising your phone

- *Default profile* Select the profile you want to activate each time you connect a certain enhancement to your phone.
- Automatic answer Set the phone to answer an incoming call automatically after 5 seconds after you connect this enhancement to your phone. If the *Ringing type* is set to *Beep* once or Silent, automatic answer cannot be used, and you must answer the phone manually.

Go to

Options in the Go to main view are: Open, Edit shortcut name, Shortcuticon, Delete shortcut, Move, List view Grid view, Help, and Exit.

Use Go to for storing shortcuts, links to your favourite photos, video clips, notes, Recorder sound files, and browser bookmarks.

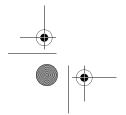

Select Enhancement.

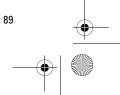

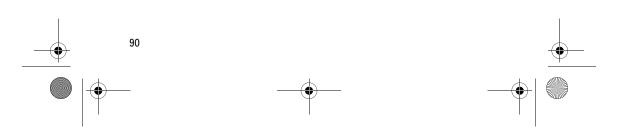

Personalising your phone

The default shortcuts are:
- opens the Notes editor,
- opens the Calendar at the current date, and
- opens the Messaging Inbox.
Shortcuts can be added only from some of the functions. Applications do not have this functionality.

Adding and using shortcuts:

- Open the application and scroll to the item that you want to add as a shortcut.
- 2. Select **Options** \rightarrow *Add to 'Go to'* and press **OK**.
- To open a shortcut, scroll to the icon and press the joystick. The file is opened in the corresponding application.
- To delete a shortcut, scroll to the shortcut that you want to remove and select **Options** → *Delete* shortcut. Removing a shortcut does not affect the file it is referring to.
- To change the shortcut name, select Options → Edit shortcut name. Write the new name. This change affects only the shortcut, not the file or the item that the shortcut refers to.

10. Extras

Notes

them to other devices. Plain text files (TXT format) you receive can be saved to Notes.

• Press keys 0 - 9 to start to write. Press the clear key to clear letters. Press Done to save.

Calculator

- 1. Enter the first number of your calculation. If you make a mistake, press the clear key to erase it.
- 2. Scroll to an arithmetic function and press the joystick to select it.
- 3. Enter the second number.
- 4. To execute the calculation, scroll to and press the joystick.

Options in Calculator are: Last result, Memory, Clear screen, Help, and Exit.

Note: This calculator has limited accuracy and is designed for simple calculations.

- To add a decimal, press the # key.
- Use and to view previous calculations and move in the sheet.

Converter

⇔ Select **Menu** → $\textbf{Extras} \rightarrow \textbf{Converter}.$

In Converter, you can convert measurement parameters such as Length from one unit to another, for example, Yards to Metres.

The Converter has limited accuracy and rounding errors may occur.

Converting units

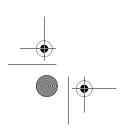

Options in Converter: Conversion type, Currency rates (not applicable to other units), Help, and

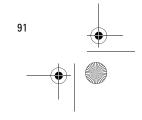

To make currency conversion you must first set the exchange rate. See "Setting a base currency and exchange rates" on page 92.

- Scroll to the *Type* field and press the joystick to open a list of measurement parameters. Scroll to the measurement parameter you want to use and press **OK**.
- Scroll to the first *Unit* field and press joystick to open a list of available units. Select the unit from which you want to convert and press **OK**.
- Scroll to the next *Unit* field and select the unit to which you want to convert.
- Scroll to the first Amount field and enter the value that you want to convert. The other Amount field changes automatically to show the converted value.

Press the # key to add a decimal and press the • key for the +, - (for temperature), and E (exponent) symbols.

The conversion order changes if you write a value in the second *Amount* field. The result is shown in the first *Amount* field.

Setting a base currency and exchange rates

Before you can carry out currency conversions, you need to choose a base currency (usually your domestic currency) and add exchange rates.

The rate of the base currency is always 1. The base currency determines the conversion rates of the other currencies.

- Select Currency as the measurement parameter type and select Options → Currency rates. A list of currencies opens and you can see the current base currency at the top.
- To change the base currency, scroll to the currency (usually your domestic currency), and select **Options** → Set as base curr.
- 3. Add exchange rates, scroll to the currency, and enter a new rate, that is, how many units of the currency equal one unit of the base currency you have selected.
- After you have inserted all the required exchange rates, you can make currency conversions. See "Converting units" on page 91.

Recorder

 $\qquad \qquad \mathsf{Select}\: \mathbf{Menu} \to \mathbf{Extras}$

→ Recorder.

The voice recorder allows you to record telephone conversations and voice memos. If you are recording a telephone conversation, both parties hear a tone every 5 seconds during recording.

92

Extras

Recorded files are stored in the Gallery. See "Gallery" on page 34.

Options in Recorder are: Record sound clip, Delete, Rename sound clip, Send, Go to Gallery, Settings, Add to 'Go to', Help, and Exit.

The recorder cannot be used when a data call or GPRS connection is

- to play an opened sound

active.

Changing clock settings

Options in Clock: Set alarm, Reset alarm, Remove alarm, Settings, Help, and Exit.

To change the time or date, select
 Options → Settings in Clock.

Setting an alarm

To set a new alarm, select
 Options → Set alarm.

- Enter the alarm time and press
 OK. When the alarm is active, the indicator is shown.
- To cancel an alarm, go to Clock and select Options → Remove alarm.

Turning off the alarm

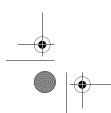

- Press **Stop** to turn off the alarm.
- Press Snooze to stop the alarm for 5 minutes, after which it resumes. You can do this a maximum of five times.

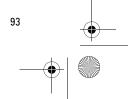

If the alarm time is reached while the device is switched off, the device switches itself on and starts sounding the alarm tone. If you press **Stop**, the device asks whether you want to activate the device for calls. Press **No** to switch off the device or **Yes** to make and receive calls. Do not press **Yes** when wireless phone use may cause interference or danger.

Personalising the alarm tone

- To personalise the alarm tone, select **Options** → Settings.
- 2. Scroll to *Clock alarm tone* and press the joystick.
- 3. When you scroll through the list of tones, you can stop on a tone to listen to it before you make your selection. Press **Select** to select the current tone.

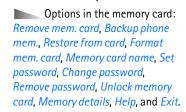

For details on inserting a memory card into the phone, see the Getting Started section. You can use it to store your multimedia files such as video clips and sound files, photos, and messaging data, and to back up information from your phone's memory.

Included with your Nokia phone is a Reduced Size MultiMedia Card (RS-MMC) that may contain add-on applications from independent developers. These applications are designed by the developers to be compatible with your phone.

Use only compatible
MultiMediaCard (MMC) with this
device. The compatible MMC for
your phone is Reduced Size Dual
Voltage MultiMediaCard. Other
memory cards, such as Secure Digital
(SD) cards, do not fit in the MMC
card slot and are not compatible
with this device. Using an
incompatible memory card may

damage the memory card as well as the device, and data stored on the incompatible card may be corrupted.

Details of how you can use the memory card with other features and applications of your phone are given in the sections describing these features and applications.

Keep all memory cards out of the reach of small children.

Formatting the memory card

When a memory card is formatted, all data on the card are permanently lost.

Some memory cards are supplied pre-formatted and others require formatting. Consult your retailer to find out if you must format the memory card before you can use it.

 Select Options → Format mem. card.

Select **Yes** to confirm. When formatting is complete, enter a name for the memory card (max. 11 letters or numbers).

Backing up and restoring information

To back up information from your phone's memory to the memory card, select **Options** \rightarrow *Backup phone mem.*

Extras

To restore information from the memory card to the phone's memory, select **Options** \rightarrow *Restore from card*.

You can only back up the phone memory and restore it to the same phone.

Locking the memory card

To set a password to lock your memory card to help prevent unauthorised use, select **Options** \rightarrow Set password.

You are asked to enter and confirm your password. The password can be up to eight characters long.

The password is stored in your phone and you do not have to enter it again while you are using the memory card on the same phone. If you want to use the memory card on another phone, you are asked for the password.

Unlocking a memory card

If you insert another password-protected memory card into your phone, you are prompted to enter the password of the card. To unlock the card:

• Select **Options** → *Unlock* memory card.

Once the password is removed, the memory card is unlocked and can be used on another phone without a password.

Checking memory consumption

You can check the memory consumption of different data groups and the available memory for installing new applications or software on your memory card:

• Select **Options** → *Memory* details.

■ Wallet

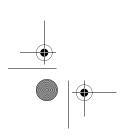

⇔ Select **Menu** → Extras \rightarrow Wallet.

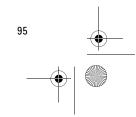

Options in the wallet main view are: Open, Settings, Help, and

Wallet provides you with a storage area for your personal information, such as credit and debit card numbers, addresses and other useful data, for example, user names and passwords.

The information stored in the wallet can be easily retrieved while browsing to automatically complete online forms on browser pages, for example, when the service asks for credit card details. Data in the wallet are encrypted and protected with a wallet code that you define.

You can group wallet data into profiles that can be accessed, for example, when making purchases online.

Due to the nature of the wallet, it automatically closes after 5 minutes. Enter the wallet code to regain access to the contents. You can change this automatic time-out period, if required. See "Wallet settings" on page 99.

Each time you open the wallet you are prompted for a wallet code.

When you open the wallet for the first time, you must create your own access code:

- 1. Enter a code of your choice (4 -10 alphanumeric characters), and press OK.
- 2. You are prompted to verify the code. Enter the same code and press **OK**. Do not give your wallet code to anyone else.

3. Enter the code that you have created and press OK.

If you enter the wallet code incorrectly on three consecutive occasions, the wallet application is blocked for 5 minutes. The block time increases if further incorrect wallet codes are entered.

If you forget your wallet code, you have to reset the code, and you will lose all information stored in the wallet. See "Resetting the wallet and wallet code" on page 99.

Storing personal card details

- 1. Select the *Cards* category from the main wallet menu and press the joystick.
- 2. Select a type of card from the list and press the joystick.
 - Payment cards Credit and debit cards.
 - Loyalty cards Membership and store cards.
 - Online acc. cards Personal user names and passwords to online services.
 - Address cards Basic contact details for home/office.
 - **User info cards** Customised personal preferences for online services.

- Select **Options** → *New card*. A blank form opens.
- 4. Fill in the fields and press Done.

You can also receive card information directly to the phone from a card issuer or service provider (if they offer this service). You are notified which category the card belongs to. Either save or discard the card. You can view and rename a saved card, but you cannot edit it.

You can open, edit or delete the fields in the card. Any changes are saved upon exiting.

Options when viewing or editing card details: *Delete*, *Help*, and *Exit*.

Personal notes are a means of storing sensitive information, for example, a bank account number. You can access the data in a personal note from the browser. You can also send a note as a message.

- Select the <u>Personal notes</u> category from the main wallet menu and press the joystick.
- Select Options → New note. A blank note opens.
- Press key 0 9 to start writing.
 Press the clear key to clear characters. Press Done to save.

Creating a wallet profile

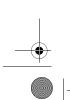

Once you have stored your personal details, you can combine them together into a wallet profile. Use a wallet profile to retrieve wallet data from different cards and categories to the browser.

- Select the Wallet profiles
 category from the main wallet
 menu and press the joystick.
- Select Options → New profile. A new wallet profile form opens.
- Fill in the fields as indicated below and press **Done**.
 Some of the fields must contain data selected from the wallet.
 Save the data under the relevant category before creating a wallet profile, or the profile cannot be
 - Profile name Choose and enter a name for the profile.

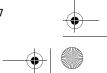

created.

- Payment card Select a card from the Payment card category.
- Loyalty card Select a card from the Loyalty card category.
- Online access card Select a card from the Online access card category.

Extras

- Shipping address Select an address from the Address card category.
- Billing address By default this is the same as the Shipping address. If you require a different address, select one from the Address card category.
- User info card Select a card from the User info card category.
- Receive e-receipt Select a destination from the Address card category.
- Deliver e-receipt Select To phone, To e-mail, or To pho. & e-mail.
- RFID sending Set to On or Off. Defines whether or not your unique phone identification is sent with the wallet profile (for future development dependent on RFID-based ticketing).

Retrieving information from the wallet to your browser

When using online mobile services supporting the wallet functionality, you can upload the data stored in your wallet to automatically enter your details into an online form. For example, by uploading your payment

card details you do not need to enter the card number and expiry date each time you need them (depending on the content being browsed). Also, you can retrieve your user name and password stored as an access card when connecting to a mobile service that requires authentication. See "Purchasing an item" on page 104.

A cache is a memory location that is used to store data temporarily. If you have tried to access or have accessed confidential information requiring passwords, empty the cache after each use. The information or services you have accessed is stored in the cache. To empty the cache, select $Menu \rightarrow Web \rightarrow Options \rightarrow Navigation options \rightarrow Clear Cache.$

Viewing ticket details

Options in the Tickets main view are: *View*, *Delete*, *Rename*, *Mark/Unmark*, *Help*, and *Exit*.

You can receive notifications of tickets purchased online via the browser. Received notifications are stored in the wallet. To view the notifications:

- Select the *Tickets* category from the main wallet menu and press the joystick.
- 2. Select **Options** \rightarrow *View*.

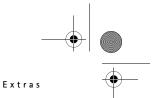

Wallet settings

Select **Options** \rightarrow *Settings* from the main wallet menu:

- Wallet code Change your wallet code. You are prompted to enter the current code, create a new code, and verify the new code.
- RFID Set the phone ID code, type, and sending options (for future development dependent on RFID-based ticketing).
- Automatic close Change the automatic time-out period (1 -60 minutes). After the time-out period has elapsed, the wallet code must be re-entered to gain access to the contents.

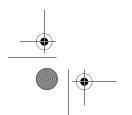

To reset both the contents of the wallet and the wallet code:

- 1. Enter *#7370925538# in standby mode.
- Enter the phone lock code, and press **OK**. See "Security" on page 86.
- 3. You are asked to confirm the erasing of data. Press **OK**.

When opening the wallet again, you must enter a new wallet code. See "Entering the wallet code" on page 96.

11. Services and Applications

■ Web (Mobile browser)

Select Menu → Web or press and hold key 0 in standby mode.

Various service providers maintain pages specifically designed for mobile phones, offering services that can be, for example, news, weather reports, banking, travel information, entertainment, and games. With the mobile browser, you can view these services as WAP pages written in HTML, WML, and XHTML pages written in XHTML, or a mixture of WML and XHTML. If you have not yet used your phone to make a WAP connection, you may need to contact your service provider for assistance with the first-time connection.

Check the availability of services, pricing, and tariffs with your network operator and/or service provider. Service providers also give you instructions on how to use their services.

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

Basic steps for accessing

- Save the settings that are needed to access the browser service that you want to use. See "Setting up the phone for the browser service" on page 100.
- Make a connection to the service. See "Making a connection" on page 101.
- Start browsing the web pages. See "Browsing" on page 102.
- End the connection to the service. See "Ending a connection" on page 105.

Setting up the phone for the browser service

Receiving settings in a smart message

You may receive service settings in a special text message, a so-called smart message, from the network operator or service provider that offers the service. See "Receiving smart messages" on page 53. For more information, contact your network operator or service provider.

Entering the settings manually

Follow the instructions given to you by your service provider.

- Select Menu → Settings → Connection → Access points and define the settings for an access point. See "Connection settings" on page 82.
- 2. Select Menu → Web → Options → Bookmark manager → Add bookmark. Write a name for the bookmark and the address of the browser page defined for the current access point. Select Options → Save to save the settings.

Making a connection

Once you have stored all the required connection settings, you can access browser pages.

There are three different ways to access browser pages:

- Select the homepage () of your service provider.
- Select a bookmark from the Bookmarks view.
- Press the keys 2 9 to start to write the address of a browser service. The Go to field at the bottom of the display is immediately activated and you can continue writing the address there.

Services and Applications

After you have selected a page or written the address, press the joystick to start to download the page.

Viewing bookmarks

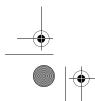

Your device may have some bookmarks loaded for sites not affiliated with Nokia. Nokia does not guarantee or endorse these sites. If you choose to access them, you should take the same precautions, for security or content, as you would with any Internet site.

Options in the Bookmarks view (when a bookmark or folder is selected): Open, Download, Back to page, Bookmark manager, Mark/Unmark, Navigation options, Advanced options, Send, Find bookmark, Details, Settings, Help, and Exit.

In the Bookmarks view, you can see bookmarks pointing to different kinds of browser pages. Bookmarks are indicated by the following icons:

• The starting page defined for the browser access point. If you use another browser access point for browsing, the starting page is changed accordingly.

🔖 - The last visited page. When the phone is disconnected from the service, the address of the last visited page is kept in memory until a new page is visited during the next connection.

When you scroll through bookmarks, you can see the address of the highlighted bookmark in the Go to field at the bottom of the display.

Adding bookmarks manually

- 1. In the Bookmarks view, select Options \rightarrow Bookmark manager \rightarrow Add bookmark.
- 2. Start to fill in the fields. Only the address must be defined. The default access point is assigned to the bookmark if no other one is selected. Press the . key to enter special characters such as /, ., :, and @. Press the clear key to clear characters.
- 3. Select **Options** \rightarrow *Save* to save the bookmark.

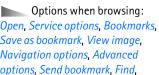

Browsing

On a browser page, new links appear underlined in blue and previously visited links in purple. Images that act as links have a blue border around them.

Options when browsing: Open, Service options, Bookmarks, Save as bookmark, View image, Navigation options, Advanced options, Send bookmark, Find, Details, Settings, Help, and Exit.

Keys and commands used in browsing

- To open a link, press the joystick.
- To scroll the view, use the joystick.
- To enter letters and numbers in a field, press the keys 0 - 9. Press the . key to enter special characters such as I_{1} , .; and @. Press the clear key to clear characters.
- To go to the previous page while browsing, press Back. If Back is not available, select **Options** \rightarrow $Navigation options \rightarrow History to$ view a chronological list of the pages you have visited during a browsing session. The history list is cleared each time a session is closed.
- To check boxes and make selections, press the joystick.
- To retrieve the latest content from the server, select Options \rightarrow Navigation options \rightarrow Reload.

To disconnect from a browser service and to quit browsing, press and hold the end key.

Saving bookmarks

- To save a bookmark while browsing, select **Options** \rightarrow *Save* as bookmark.
- To save a bookmark received in a smart message, open the message in the Inbox in Messaging and select **Options** \rightarrow Save to bookmarks. See "Receiving smart messages" on page 53.

Viewing saved pages

Options in the Saved pages view are: Open, Back to page, Reload, Saved pages, Mark/Unmark, Navigation options, Advanced options, Details, Settings, Help, and Exit.

If you regularly browse pages containing information which doesn't change very often, you can save and then browse them when offline.

• To save a page, while browsing select **Options** \rightarrow *Advanced* options \rightarrow Save page.

Saved pages are indicated by the following icon:

Services and Applications

The saved browser page. In the saved pages view you can also create folders to store your saved browser pages.

Folders are indicated by the following icon:

- Folder containing saved browser pages.

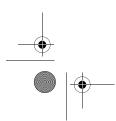

• To open the Saved pages view, move the joystick to the right in the Bookmarks view. In the Saved pages view, press the joystick to open a saved page.

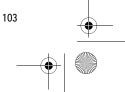

To start a connection to the browser service and to retrieve the page again, select **Options** → *Navigation* $options \rightarrow Reload.$

The phone stays online after you reload the page.

A cache is a memory location that is used to store data temporarily. If you have tried to access or have accessed confidential information requiring passwords, empty the cache after each use. The information or services you have accessed is stored in the cache. To empty the cache, select Menu \rightarrow Web \rightarrow Options \rightarrow Navigation options \rightarrow Clear Cache.

Downloading

You can download items such as ringing tones, images, operator logos, software, and video clips using the mobile browser. These items can be provided free or you can purchase them.

Once downloaded, items are handled by the respective applications on your phone, for example, a downloaded photo is saved in the Gallery.

Important: Only install and use applications and other software from sources that offer adequate security and protection against harmful software.

Purchasing an item

To download the item:

- 1. Scroll to the link and select Options \rightarrow *Open*.
- 2. Choose the appropriate option to purchase the item, for example,

Carefully read all the information provided.

If the online content is compatible, you can use your wallet information to make the purchase:

- 1. Select **Options** \rightarrow *Open wallet*. You are prompted for your wallet code. See "Entering the wallet code" on page 96.
- 2. Select the appropriate card category from your wallet.
- 3. Select Fill in. This uploads the selected wallet information.

If the wallet does not contain all information necessary for the purchase, you are requested to enter the remaining details manually.

Copyright protection may prevent some images, ringing tones, and other content from being copied, modified, transferred or forwarded.

Checking an item before downloading

You can see details about an item before you download it. Details about an item may include the price, a brief description and size.

- Scroll to the link and select Options \rightarrow *Open*. Details about the item are displayed on your phone.
- If you want to continue with the downloading, press Accept, or if you want to cancel the download, press Cancel.

Ending a connection

- Select **Options** → *Advanced* options → Disconnect, or
- Press and hold the end key to quit browsing and to return to standby mode.

Browser settings

Select **Options** \rightarrow *Settings*:

- Default access point To change the default access point, press the joystick to open a list of available access points. The current default access point is highlighted. See "Connection settings" on page 82.
- **Show images** Choose whether to view pictures when you are browsing. If you choose *No*, you can later load images during browsing by selecting **Options** \rightarrow Show images.
- Font size You can choose three text sizes in the browser: Smallest, Normal, and Largest.
- **Default encoding** To make sure your browser pages display text characters correctly, select the appropriate language type.
- Automatic bookmarks Choose On if you want the bookmarks to be automatically saved in the Auto. bookmarks folder when you visit a page. When you select

Services and Applications

Hide folder, the bookmarks are still automatically added to the folder.

- Screen size Choose how to use the display area for viewing pages.
- Rendering Choose the image quality for the pages. With the high image quality, the page download speed is slower, and vice versa.
- Cookies Allow Reject. You can enable or disable the receiving and sending of cookies (a means for content providers to identify users and their preferences for frequently used content).
- Security warnings Choose to hide or show security notifications.
- Conf. DTMF sending -Always First time only. Choose whether you want to confirm before the phone sends DTMF tones during a voice call. See "Options during a call" on page 13. For example, you can make a voice call while you are viewing a browser page, send DTMF tones while a voice call is in progress, and save a name and phone number from a browser page into Contacts.

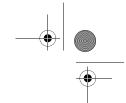

Services and Applications

 Wallet - Choose On to open the wallet automatically when a compatible browser page is opened.

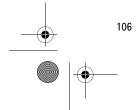

■ Games

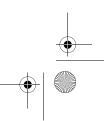

To start a game, scroll to the game icon and press the joystick. For instructions on how to play the game, select **Options** \rightarrow *Help*.

12. Connectivity

■ PC Suite

You can use your phone with a variety of PC connectivity and data communications applications. With PC Suite you can synchronize contacts, calendar and to-do notes and notes between your phone and the compatible PC, or a remote Internet server (network service).

You may find more information about PC Suite and the download link in the support area on the Nokia's Web site, <www.nokia-asia.com/support>.

Bluetooth connection

This device is

compliant with

 \Leftrightarrow Select **Menu** \rightarrow Connectivity \rightarrow Bluetooth.

Bluetooth wireless technology Specification 1.1 supporting the following profiles: Hands-free, Object Push Profile, File Transfer Profile, Dial Up Networking Profile and Fax Profile. To ensure interoperability between other devices supporting Bluetooth

wireless technology, use Nokia approved enhancements for this model. Check with the manufacturers of other devices to determine their compatibility with this device.

There may be restrictions on using Bluetooth technology in some locations. Check with your local authorities or service provider.

Features using Bluetooth wireless technology, or allowing such features to run in the background while using other features, increase the demand on battery power and reduces the battery life.

Bluetooth technology enables wireless connections between electronic devices within a maximum range of 10 metres. A Bluetooth connection can be used to send images, videos, texts, business cards, calendar notes, or to connect wirelessly to compatible devices using Bluetooth technology, such as computers. Please note that not all computers using Bluetooth technology are necessarily compatible.

Connectivity

Since devices using Bluetooth technology communicate using radio waves, your phone and the other devices do not need to be in direct line-of-sight. The two devices only need to be within a maximum of 10 metres of each other, although the connection can be subject to interference from obstructions such as walls or from other electronic devices. Using Bluetooth technology consumes the battery and the phone's operating time is reduced. Take this into account when performing other operations with your phone. There may be restrictions on using devices using Bluetooth technology. Check with your local authorities.

When you activate Bluetooth technology for the first time, you are asked to give a name to your phone.

It is recommeded

- to use the phone in the hidden mode.
- to agree any communication via BT in advance with other people.

You can also switch off BT without affecting other functionalities of the phone.

Bluetooth connection settings

- Bluetooth On Off.
- My phone's visibility Shown to all - Your phone can be found by other Bluetooth devices or Hidden - Your phone cannot be found by other devices. For security reasons it is advisable to use the hidden mode whenever possible.
- My phone's name Define a name for your phone.

After you have set the Bluetooth connection as active and changed *My phone's visibility* to *Shown to all*, your phone and this name can be seen by other Bluetooth device users.

Sending data via Bluetooth technology

There can be only one active Bluetooth connection at a time.

- Open an application where the item you wish to send is stored.
 For example, to send a photo to another device, open the Gallery application.
- Scroll to the item you want to send and select **Options** → *Send* → *Via Bluetooth*.

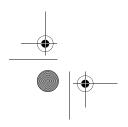

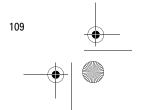

- 3. The phone starts to search for devices within range. Devices using Bluetooth technology that are within range start to appear on the display one by one. You can see a device icon, the device's name, the device type, or a short name. Paired devices are shown with **. A paired device is one where a Bluetooth connection already exists between your phone and the other device.
 - To interrupt the search, press Stop. The device list freezes and you can start to form a connection to one of the devices already found.
- 4. When searching for devices, some devices may show only the unique device addresses. To find out the unique address of your phone, enter the code *#2820# in standby mode when the Bluetooth connection is active. If you have searched for devices earlier, a list of the devices that were found previously is shown first. To start a new search, select More devices. If you switch off the phone, the list of devices is cleared and the device search needs to be started again before sending data.

- 5. Scroll to the device you want to connect with and press **Select**. The item you are sending is copied to Outbox and the note *Connecting* is shown.
- 6. Pairing (if not required by the other device, go to step 7.)
 - If the other device requires pairing before data can be transmitted, a tone sounds and you are asked to enter a passcode.
 - Create your own passcode (1-16 characters long, numeric) and agree with the owner of the other device to use the same code. This passcode is used only once and you do not have to memorise it.
 - After pairing, the device is saved to the Paired devices view.
- When the connection has been successfully established, the note Sending data is shown.

Data received via Bluetooth connection can be found in the Inbox folder in Messaging. See "Inbox - receiving messages".

Connectivity

Icons for different devices:

🖢 - Computer, 🐮 - Phone,

ब्रा - Audio/video, and

* - Bluetooth device.

If sending fails, the message or data are deleted. The Drafts folder in Messaging does not store messages sent via Bluetooth connection.

Checking the status of the **Bluetooth connection**

- When * is shown in standby mode, the Bluetooth connection is active.
- When (*) is blinking, your phone is trying to connect to the other device.
- When (*) is shown continuously, the Bluetooth connection is active.

Paired devices view

Paired devices are easier to recognise, they are indicated by ** in the search result list. In the Bluetooth main view, move the joystick to the right to open a list of paired devices (米光米).

• To pair with a device: Select **Options** \rightarrow *New paired device.* The phone starts a device search. Scroll to the device you want to pair with and press Select. Exchange passcodes. The device is added to the Paired devices list. To cancel pairing: Scroll to the device whose pairing you want to cancel and press the clear key or select **Options** \rightarrow *Delete*. If you want to cancel all pairings, select **Options** \rightarrow *Delete all.*

If you are currently connected to a device, and delete the pairing with that device, the pairing is removed and the device connection is terminated, but Bluetooth connection remains active on the handset.

To set a device to be authorised or unauthorised: Scroll to the device and select **Options** \rightarrow **Set** as authorised - Connections between your phone and this device can be made without your knowledge. No separate acceptance or authorisation is needed. Use this status only for your own devices that others do not have access to, for example your PC, or devices that belong to someone you trust. The icon 🖨 is added next to authorised devices in the Paired devices view. Set as unauthorised - Connection requests from this device need to be accepted separately every time.

Receiving data via Bluetooth wireless technology

When you receive data via Bluetooth wireless technology, a tone sound is played and you are asked if you want to accept the message. If you accept, the item is placed in the Inbox folder in Messaging. Messages received via Bluetooth technology are indicated by (*). See "Inbox - receiving messages" on page 52.

Disconnecting Bluetooth connection

A Bluetooth connection is disconnected automatically after sending or receiving data.

Infrared connection

|||000

♦ Select **Menu** → **Connectivity** → **Infrared**.

Via infrared, you can send or receive data such as business cards and calendar notes to and from a compatible phone or data device.

Do not point the IR (infrared) beam at anyone's eye or allow it to interfere with other IR devices. This device is a Class 1 laser product.

Sending and receiving data via infrared

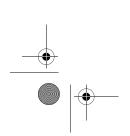

- 1. Make sure that the infrared ports of the sending and receiving devices are pointing at each other and that there are no obstructions between the devices. The preferable distance between the two devices is 1 metre at most. See "Keys and parts" on page 5.
- The user of the receiving device activates the infrared port.
 To activate the infrared port of your phone to receive data via infrared, go to Menu →
 Connectivity → Infrared.
- 3. The user of the sending device selects the desired infrared function to start data transfer.

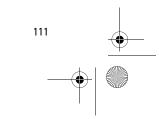

To send data via infrared, select **Options** \rightarrow *Send* \rightarrow *Via infrared* in an application.

If data transfer is not started within 1 minute after the activation of the infrared port, the connection is cancelled and must be started again.

All items that are received via infrared are placed in the Inbox folder in Messaging. New infrared message are indicated by

Connectivity

Checking the status of the infrared connection

- When •••• blinks, your phone is trying to connect to the other device or a connection has been lost
- When **** is shown continuously, the infrared connection is active and your phone is ready to send and receive data via its infrared port.

♦ Select **Menu** → **Connectivity** → **Connection** manager.

Options in the Connection manager main view when there are one or more connections are:

Details, Disconnect, Disconnect all, Help and Exit.

In the Connection manager, you can identify the status of multiple data connections, view details on the amount of data sent and received, and end unused connections.

You can view details of data connections only. Voice calls are not listed.

When you open the Connection manager, you can see a list of:

- Open data connections,
 Data call, G-GPRS.
- The status of each connection.
- Amount of data uploaded and downloaded for each connection (GPRS connections only).
- The approximate duration of each connection (Data call connections only).

Note: The actual time invoiced for calls by your service provider may vary, depending on network features, rounding off for billing, and so forth.

Viewing connection details

To view the details of a connection, scroll to a connection and select **Options** \rightarrow *Details*. The following is displayed:

- Name The name of the Internet Access Point (IAP) in use.
- Bearer The type of data connection: Data call or GPRS.
- *Status* The current status of the connection.
- Received The amount of data, in bytes, received to the phone.
- Sent The amount of data, in bytes, sent from the phone.

Duration - The length of time that the connection has been open.

- Speed The current speed of both sending and receiving data in KB/s (kilobytes per second).
- Dial-up (GSM) The dial-up number used, or Name (GPRS) access point name used.
- Shared (not displayed if the connection is not shared) - The number of applications using the same connection.

Ending connections

- Scroll to a connection and select **Options** → *Disconnect* to end that connection only.
- Select **Options** \rightarrow *Disconnect all* to close all currently open connections.

Connecting your phone to a compatible computer

For further information on how to make a connection to a compatible computer via USB, infrared or Bluetooth technology, and how to install Nokia PC Suite, see the Quick Guide for Nokia PC Suite. For further information on how to use Nokia PC Suite, see the help function on PC

Suite or visit the support pages at www.nokia-asia.com/support.

Using your phone as a modem

\Longrightarrow Select Menu \Longrightarrow Connectivity \Longrightarrow Modem.

Use your phone as a modem to connect to the Internet with a compatible PC, or to send and receive faxes.

Detailed installation instructions can be found in the PC Suite user quide. You can find more information about PC Suite and the download link in the support area on the Nokia's Web site, <www.nokia-asia.com/support>.

Remote synchronisation

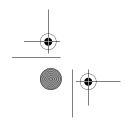

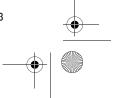

The Sync application enables you to synchronise your calendar or contacts with various calendar and address book applications on a compatible computer or on the Internet. Synchronisation takes place over a GSM data call or packet data connection.

Connectivity

The synchronisation application uses SyncML technology for synchronisation. For information on SyncML compatibility, contact the supplier of the calendar or address book application you want to synchronise your phone data with.

Creating a new synchronisation profile

Options in the Remote sync main view are: Synchronise, New sync profile, Edit sync profile, Delete, View log, Help, and Exit.

- 1. If no profiles have been defined, the phone asks you if you want to create a new profile. Select Yes. To create a new profile in addition to existing ones, select **Options** \rightarrow *New sync profile*. Choose whether you want to use the default setting values or copy the values from an existing profile to be used as the basis for the new profile.
- 2. Define the following: Sync profile name - Write a descriptive name for the profile.

Data bearer - Select Web to synchronize with a server on the internet or Bluetooth to synchronize with a nearby device, such as a compatible computer.

Access point - Select an access point you want to use for the data connection.

Host address - Contact your service provider or system administrator for the correct values.

Port - Contact your service provider or system administrator for the correct values.

User name - Your user ID for the synchronisation server. Contact your service provider or system administrator for your correct ID.

Password - Write your password. Contact your service provider or system administrator for the correct value.

Allow sync requests - To allow synchronisations initialised by this server.

Accept all sync regs. - To have your phone ask for your confirmation before accepting synchronisation from this server.

Move the joystick to the right and select the application that you wish to synchronise.

The available applications that you can synchronise may vary. Contact your service provider for more information.

3. Press **Done** to save the settings.

Synchronising data

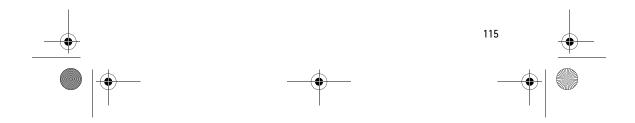

In the Sync main view, you can see the different profiles, and what kind of data are synchronised: Calendar, Contacts, or both.

In the main view, scroll to a profile and select **Options** → Synchronise. The status of the synchronisation is shown at the bottom of the screen.

To cancel synchronisation before it is finished, press **Cancel**.

- 2. You are notified when the synchronisation has been completed.
- After synchronisation is complete, select **Options** → *View log* to open a log file showing the synchronisation status (*Complete* or *Incomplete*) and how many calendar or contact entries have been added, updated, deleted, or discarded (not synchronised) in the phone or on the server.

Troubleshooting

13. Troubleshooting

Memory low

When the following notes are shown, the phone memory is low and you must start to delete some data: Not enough memory to perform operation. Delete some data first. or Memory low. Delete some data. To view what kind of data you have and how much memory the different data groups consume, go to File manager and select Options \rightarrow Memory details.

You may want to delete the following items regularly to avoid memory getting low:

- Messages from the Inbox, Drafts, and Sent folders in Messaging.
- Retrieved e-mail messages from the phone memory.
- Saved browser pages.
- Images and photos in Images.

To delete contact information, calendar notes, call timers, call cost timers, game scores, or any other data, go to the respective application to remove the data.

If you are deleting multiple items and another of the following notes are shown: Not enough memory to perform operation. Delete some data first. or Memory low. Delete some data. try deleting items one by one (starting from the smallest item).

Clearing the calendar memory - To remove more than one event at a time, go to the Month view and select **Options** \rightarrow *Delete entry* \rightarrow and either:

Before date - to delete all calendar notes which take place before a certain date. Enter the date before which all calendar notes are deleted.

• All entries - to delete all calendar

Erasing log information - To erase all the log contents, Recent calls register, and Messaging delivery reports permanently, go to Logs and select **Options** \rightarrow *Clear log* or go to Settings \rightarrow Log duration \rightarrow No log.

Different ways to store data:

- Use Nokia PC Suite to make a backup copy of all data to a compatible computer.
- Send images to your e-mail address and then save the images to your computer (network service).
- Send data via infrared or Bluetooth technology to a compatible device.
- Store data on a compatible memory card.

ABD

Camera

• Q: Why do images look smudgy? A: Check that the camera lens protection window is clean.

Bluetooth

• Q: Why can't I end a Bluetooth connection?

A: If another device is connected to your phone, you can either end the connection using the other device or by deactivating Bluetooth. Select Bluetooth and select the setting *Bluetooth* →

Q: Why can't I find my friend's Bluetooth-enabled device.

Troubleshooting

friend have activated Bluetooth. Check that the distance between the two devices is not over 10 metres or that there are no walls or other obstructions between the devices.

A: Check that both you and your

Check that the other device is not in 'Hidden' mode.

Check that both devices are compatible.

Multimedia messaging

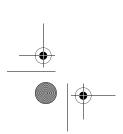

Q: What should I do when the phone tells me that it cannot receive a multimedia message because the memory is full?

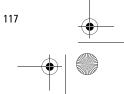

A: The amount of memory needed is indicated in the error message: Not enough memory to retrieve message. Delete some data first.

To view what kind of data you have and how much memory the different data groups consume, go to **File manager** and select **Options** \rightarrow *Memory details*.

Q: How can I end the data connection when the phone starts a data connection again and again? The brief notes on the display state that the phone is retrieving or trying to retrieve a message. What is happening?

Troubleshooting

A: The phone is trying to retrieve a multimedia message from the multimedia messaging centre.

Check that the settings for multimedia messaging have been defined correctly and that there are no mistakes in phone numbers or addresses. Select Messaging and select Options → Settings → Multimedia message.

To stop the phone from making a data connection, you have the following options. Select Messaging and select Options → Settings → Multimedia message, and then:

- Select On receiving msg. →
 Defer retrieval if you want the
 multimedia messaging centre
 to save the message to be
 retrieved later, for example,
 after you have checked the
 settings. After this change,
 the phone still needs to send
 information notes to the
 network. To retrieve the
 message later, select Retr.
 immediately.
- Select On receiving msg. →
 Reject message if you want
 to reject all incoming
 multimedia messages. After
 this change, the phone needs
 to send information notes to

the network and the multimedia-messaging centre deletes all multimedia messages that are waiting to be sent to you.

Select Multimedia reception
 → Off- if you want to ignore
 all incoming multimedia
 messages. After this change,
 the phone will not make any
 network connections related
 to multimedia messaging.

Messaging

• Q: Why can't I select a contact?
A: If you cannot select a contact in the Contacts directory, the contact card does not have a phone number or an e-mail address. Add the missing information to the contact card in the Contacts application.

Calendar

Q: Why are the week numbers missing?

A: If you have changed the Calendar settings so that the week starts on a day other than Monday, then the week numbers are not shown.

Browser Services

• Q: No valid access point defined. Define one in Web settings.

A: Insert proper browser settings. Contact your service provider for instructions.

Log

• Q: Why does the log appear to be empty?

A: You may have activated a filter, and no communication events fitting that filter have been logged. To see all events, select **Options** \rightarrow *Filter* \rightarrow *All communication*.

PC connectivity

 Q: Why do I have problems in connecting the phone to my PC?

A: Make sure that Nokia PC Suite is installed and running on your PC. See the Quick Guide for Nokia PC Suite. For further information on how to use Nokia PC Suite, see the help function on PC Suite or visit the support pages at www.nokia-asia.com/support.

Access codes

 Q: What is my password for the lock, PIN, or PUK codes?

A: The default lock code is 12345. If you forget or lose the lock code, contact your phone dealer.

Troubleshooting

If you forget or lose a PIN or PUK code, or if you have not received such a code, contact your network service provider.

For information about passwords, contact your access point provider, for example, a commercial Internet Service Provider (ISP), service provider, or network operator.

Application not responding

• Q: How do I close an application that is not responding?

A: Open the application switching window by pressing and holding (§). Then scroll to the application, and press the clear key to close the application.

■ Charging and Discharging

Your phone is powered by a rechargeable battery.

Note that a new battery's full performance is achieved only after two or three complete charge and discharge cycles!

The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk-time and standby time) is noticeably shorter than normal, it is time to buy a new battery.

Use only batteries approved by the phone manufacturer and recharge your battery only with the chargers approved by the manufacturer. Unplug the charger when not in use. Do not leave the battery connected to a charger for longer than a week, since overcharging may shorten its lifetime. If left unused a fully charged battery will discharge itself over time.

Temperature extremes can affect the ability of your battery to charge.

Use the battery only for its intended purpose.

Never use any charger or battery which is damaged.

Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes direct connection of the + and - terminals of the battery (metal strips on the battery) for example when you carry a spare battery in your pocket or purse. Short-circuiting the terminals may damage the battery or the connecting object.

Leaving the battery in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 15°C and 25°C (59°F and 77°F). A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Batteries' performance is particularly limited in temperatures well below freezing.

Do not dispose of batteries in a fire! Dispose of batteries according to local regulations (e.g. recycling). Do not dispose as household waste.

Battery information

Always use Nokia Original Enhancements for your safety. To check that you are getting a Nokia original battery, purchase it from an authorised Nokia dealer, look for the Nokia Original Enhancement logo on the packaging and inspect the battery's security features as explained below. These security features are only available for Nokia original batteries with the hologram labels.

The following steps are provided to help you confirm that your battery is an authentic Nokia Original Enhancement. Successful completion of all steps, however, is not a guarantee of the authenticity of the battery. If you have any reason to believe that your battery is not an authentic Nokia Original Enhancement, you should refrain from using it immediately and take it to the nearest authorised Nokia service centre or dealer for assistance.

How do you check the security features on your battery?

Step One:

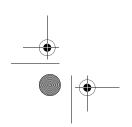

When looking at the hologram label, you should see the Nokia Connecting Hands from one angle and the Nokia Original Enhancements logo when looking from another angle.

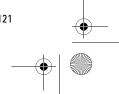

Step Two:

When you angle the hologram to the left, right, down and up sides of the logo, you should see 1, 2, 3 and 4 dots on each side respectively.

Battery information

Step Three:

Scratch the side of the label to reveal a 20-digit battery code. The 20-digit battery code reads starting from the number at the top row followed by the bottom row eg 12345678919876543210.

Step Four:

Confirm that the 20-digit battery code is valid by verifying it at the Nokia website or via a text message.

2 ways to verify the 20-digit battery code

 Go to www.nokiaoriginals.com/check and follow the instructions; or Go to Messages, then to Create Messages.

For countries in Asia Pacific excluding India:

Key in the 20-digit battery code eg 12345678919876543210 and send to +61 427 151515.

Operator SMS charges will apply. If you are verifying from a location outside Australia, international SMS charges will apply.

For India only:

Key in "Battery" followed by the 20-digit battery code eg Battery 12345678919876543210 and send to 5555. 5555 is only applicable for users of GSM network. Operator SMS charges will apply. For users of CDMA network, please check your battery via the website.

After completing all the steps, you will receive a message indicating whether the battery code is valid.

If you need assistance confirming the battery code, contact your local Nokia Care Centres listed at www.nokia-asia.com/carecentreloca tor.

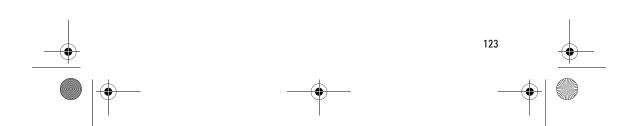

What if your battery is not authentic?

- If you cannot confirm the authenticity of your battery at any of the four steps, please stop using the battery. The use of a battery that is not approved by the manufacturer may be dangerous and may result in poor performance and damage to your device and its enhancements. It may also invalidate any approval or warranty applying to the device.
- Contact the retailer who sold you the battery for further action.

To find out more about Nokia Original Enhancements, visit www.nokiaoriginals.com.

15. Genuine Enhancements

A new extensive range of enhancements is available for your phone. Select the

enhancements which accommodate your specific communication needs.

Some of the enhancements are described in detail below.

For availability of the enhancements, please check with your local dealer. A few practical rules for enhancements operation:

- Keep the enhancements out of small children's reach.
- When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
- Check regularly that all mobile phone equipment in a vehicle is mounted and operating properly.

Use only batteries, chargers and enhancements approved by the phone manufacturer. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

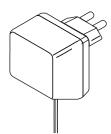

Power

ne* Standby*
ne Standoy
Up to
50 2-4
hours

* Variation in operation times may occur depending on SIM card, network and usage settings, usage style and environments. Use of FM radio and integrated hands-free will affect talktime and standby.

Standard Charger (ACP-7)

Small, lightweight and durable charger ACP-7 provides and easy and convenient way to charge the phone. It is easy to connect to phone or desktop stand.

Note: The plug types vary according to different markets.

124

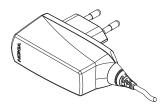

Travel Charger (ACP-12)

Small, lightweight travel charger with multivoltage (100 - 240V) switcher technology. Provides easy and convenient way to charge the phone.

Note: The plug types vary according to different markets.

Boom Headset (HDB-4)

This small and lightweight headset has a beautiful and distinctive Nokia design. Gives you excellent audio quality and you can answer or end

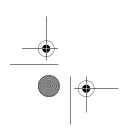

Genuine Enhancements

calls by pressing the button on the microphone part of the headset.

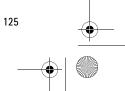

Care and Maintenance

16. Care and Maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The suggestions below help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that corrode electronic circuits. If your device does get wet, remove the battery and allow the device to dry completely before replacing it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be
- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.

- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use a soft, clean, dry cloth to clean any lenses (such as camera, proximity sensor, and light sensor lenses).
- Use only the supplied or an approved replacement antenna. Unauthorised antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.

All of the above suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.

17. Additional safety information

Operating environment

Remember to follow any special regulations in force in any area and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. To maintain compliance with radio frequency exposure guidelines only use enhancements approved by Nokia for use with this device. When the device is on and being worn on the body, always use an approved holder or carrying case.

Parts of the device are magnetic. Metallic materials may be attracted to the device, and persons with a hearing aid should not hold the device to the ear with the hearing aid. Always secure the device in its holder, because metallic materials may be attracted by the earpiece. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.

Medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device in health care facilities when any regulations posted in

these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 6 in. (15.3 cm) be maintained between a wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers should:

- always keep the device more than 6 in. (15.3 cm) from their pacemaker when the device is switched on;
- not carry the device in a breast pocket; and
- hold the device to the ear opposite the pacemaker to minimise the potential for interference.

If you have any reason to suspect that interference is taking place, switch off your device immediately.

Hearing aids

Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

Additional safety information

Enhancements

A few practical rules about accessories and enhancements.

- Keep all accessories and enhancements out of the reach of small children.
- When you disconnect the power cord of any accessory or enhancement, grasp and pull the plug, not the cord.
- Check regularly that enhancements installed in a vehicle are mounted and are operating properly.
- Installation of any complex car enhancements must be made by qualified personnel only.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (antilock) braking systems, electronic speed control systems, air bag systems. For more information, check with the manufacturer or its representative of your vehicle or any equipment that has been added.

Only qualified personnel should service the device, or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same

compartment as the device, its parts, or enhancements. For vehicles equipped with an air bag, remember that air bags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Using your device while flying in aircraft is prohibited. Switch off your device before boarding an aircraft. The use of wireless teledevices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

■ Potentially explosive environments

Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions. Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refuelling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, chemical plants or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied

petroleum gas (such as propane or butane), and areas where the air contains chemicals or particles such as grain, dust or metal powders.

■ Safety information about video games

About photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause photosensitive epileptic seizures while watching video games. These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. Immediately stop playing and consult a

doctor if you experience any of these symptoms. Adults who allow teenagers (or children) to play the games should watch for or ask their children about these symptoms as they are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by playing in a well-lit room and by not playing when you are drowsy or fatigued. If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Play safely

Take a break from playing games at least every half hour. Stop playing immediately if you begin to feel tired of if you experience an unpleasant sensation or pain in your hands and/or arms. If the condition persists, consult a doctor. Use of vibration can aggravate injuries.

Do not turn vibration on if you have any ailment in the bones or joints of your fingers, hands, wrists, or arms.

Emergency calls

Important: Wireless phones, including this device, operate using radio signals, wireless networks, landline networks, and user-programmed functions. Because of this, connections in all conditions cannot be guaranteed. You should never rely solely on any wireless device for essential communications like medical emergencies.

To make an emergency call:

- 1. If the device is not on, switch it on. Check for adequate signal strength. Some networks may require that a valid SIM card is properly inserted in the device.
- 2. Press the end key as many times as needed to clear the display and ready the device for calls.

9237539_3230_2_en.fm Page 130 Monday, February 7, 2005 4:59 PM

Additional safety information

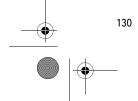

- 3. Enter the official emergency number for your present location. Emergency numbers vary by location.
- 4. Press the call key.

If certain features are in use, you may first need to turn those features off before you can make an emergency call. If the device is in offline or flight mode you must change the profile to activate the phone function before you can make an emergency call. Consult this guide or your service provider for more information.

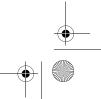

When making an emergency call, give all the necessary information as accurately as possible. Your wireless device may be the only means of communication at the scene of an accident. Do not end the call until given permission to do so.

Additional safety information

Certification information (SAR)

THIS MODEL PHONE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the limits for exposure to radio frequency (RF) recommended by international guidelines (ICNIRP). These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines were developed by independent scientific organisations through periodic and thorough evaluation of scientific studies. The guidelines include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit stated in the international guidelines is 2.0 W/kg*. Tests for SAR are conducted using standard operating positions with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a base station, the lower the power output of the phone.

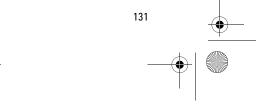

The highest SAR value for this model phone when tested for use at the ear is 0.39 W/kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the relevant international guidelines for RF exposure.

This product meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 2.2 cm away from the body. When a carry case, belt clip or holder is used for body-worn operation, it should not contain metal and should position the product at least 2.2 cm away from your body.

* The SAR limit for mobile phones used by the public is 2.0 watts/kilogram (W/kg) averaged over ten grams of body tissue. The guidelines incorporate a substantial margin of safety to give additional protection for the public and to account for any variations in measurements. SAR values may vary depending on national reporting requirements and the network band. For SAR information in other regions please look under product information at www.nokia-asia.com.

- Nokia Corporation, represented by its Mobile Phones Division ("Nokia") warrants that this Nokia cellular product and/or genuine Nokia accessory ("Product") is free from defects in material and workmanship, according to the following terms and conditions:

 1. The limited warranty for the cellular phone, data product and all genuine Nokia accessories (except battery packs) extends for the first twelve (12) months beginning on the date of purchase of the Product.

 2. The limited warranty for genuine Nokia battery packs extends for the first six (6) months beginning on the date of purchase of the Product.

 3. The limited warranty extends only to the original consumer purchaser ("Consumer") of the Product and is not assignable or transferable to any subsequent purchaser/fend user.

 4. The limited warranty extends only to Consumers who purchase the Product in one of the countries (or areas) set forth at the end of this document. The limited warranty is only valid in Nokia's intended country (or area) of sale of the Product.
- the Product.

 During the limited warranty period, Nokia or its authorized service network will repair or replace, at Nokia's option, During the limited warranty period, Nokia or its authorized service network will repair or replace, at Nokia's option, any defective Product or parts thereof with new or factory rebuilt replacement items, and return the Product to the Consumer in working condition. No charge will be made to the Consumer for either parts or labor in repairing or replacing the Product. All replaced parts, boards or equipment shall become property of Nokia. The external housing and cosmetic parts shall be free of defects at the time of shipment and, therefore, shall not be covered under these limited warranty terms.
- limited warranty terms.

 Repaired Product will be warranted for the balance of the original warranty period or for ninety (90) days from the date of repair, whichever is longer.

 Upon request from Nokia or its authorized service center, the Consumer must provide purchase receipt or other information to prove the date and place of purchase.

 Transportation, delivery and handling charges incurred in the transport of the Product to and from Nokia or its authorized service center will be borne by the Consumer.

 The Consumer shall have no coverage or benefits under this limited warranty if any of the following conditions are applicable:

- applicable:
 a) The Product has been subject to: abnormal use, abnormal condition, improper storage, exposure to moisture or
 - applicable:

 a) The Product has been subject to: abnormal use, abnormal condition, improper storage, exposure to moisture or dampness, exposure to excessive temperature or other such environmental conditions, unauthorized modifications, unauthorized connections, unauthorized repair including but not limited to use of unauthorized spare parts in repairs, misuse, neglect, abuse, accident, alteration, improper installation, Acts of God, spill of foods or liquids, maladjustment of customer controls or other acts which are beyond of reasonable control of Nokia, including deficiencies in consumable parts such as fuses and breakage or damage to antennas, unless caused directly by defects in materials or workmanship, and normal wear and tear of the Product.

 b) Nokia was not notified by Consumer of the alleged defect or malfunction of the Product during the applicable limited warranty period.

 c) The Product serial number or the accessory date code has been removed, defaced or altered.

 d) The defect or damage was caused by defective function of the cellular system or by inadequate signal reception by the external antenna.

 e) The Product was used with or connected to accessory not supplied by Nokia, not fit for use with Nokia cellular phones or used in other than its intended use.

 f) The battery was short circuited or seals of the battery enclosure or cells are broken or show evidence of tampering or the battery was seld in equipment other that for which is has been specified.

 If a problem develops during the limited warranty period, the Consumer should take the following step-by-step procedure:

 a) The Consumer shall return the Product to the place of purchase for repair or replacement processing.

 If "a' is not convenient, the Consumer may contact the local Nokia office for the location of the nearest authorized service center.
- If a problem develops during the limited warranty period, the Consumer should take the following step-by-step procedure:

 a) The Consumer shall return the Product to the place of purchase for repair or replacement processing. If "a" is not convenient, the Consumer may contact the local Mokia office for the location of the nearest authorized service center.

 c) The Consumer shall arrange for the Product to be delivered to the authorized service center. Expenses related to removing the Product from an installation are not covered under this limited warranty. The Consumer will be billed for any parts or labor charges not covered by this limited warranty. The Consumer shall be responsible for expenses related to reinstallation of the Product.

 l) The Consumer will be billed for any parts or labor charges not covered by this limited warranty. The Consumer shall be responsible for expenses related to reinstallation of the Product.

 l) If the Product is returned to Nokia after the expiration of the warranty period, Nokia's normal service policies shall apply and the Consumer will be charged accordingly.

 ANY IMPLED WARRANTY OF MECHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE OR USE, SHALL BE LIMITED TO THE DURATION OF THE FOREGOING WARTITEN WARRANTY, OTHERWISE, THE FOREGOING WARRANTY IS THE PURCHASER'S SOLE AND EXCLUSIVE REMEDY AND IS IN LIEU OF ALL OTHER WARRANTES, EXPRESS OR IMPLIED, NOKIA SHALL NOT BE LIABLE FOR INCIDENTAL DE CONSECUENTIAL DAMAGES OR A LOSS OF ANTICIPATED BENEFITS OR PROFITS, LOSS OR IMPAIRMENT OF PRIVACY OF CONVERSATIONS, WORK STOPPAGE OR LOSS OR IMPAIRMENT OF DATA ARISING OUT OF THE USE OR INABILITY OUS THE PRODUCT.

 The benefits conferred by this limited warranty are in addition to all other rights and remedies under any applicable mandatory legislation as may be in force from country (or area).

 Nokia neither assumes nor authorizes any authorized service center or any person or entity to assume for it any other obligation or liability beyond that which is expressly provided for in this limit
- 13.
