User Guide
Portable Dual Charger
5200/9000/12000 mAh
For your safety

Read these simple guidelines. Not following them may be dangerous or against local laws and regulations.

QUALIFIED SERVICE

Only qualified personnel may install or repair this product.

BATTERIES, CHARGERS, AND OTHER ACCESSORIES

Use only batteries, chargers, and other accessories approved by Microsoft Mobile for use with this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY

Your device is not water-resistant. Keep it dry.
About your portable charger

Put the portable charger in your pocket, and take it anywhere you want.

With the Portable Dual Charger 5200/9000/12000 mAh, you can charge the battery of your phone or a compatible device when you don’t have access to a regular power source.

Read this user guide carefully before using the product. Also, read the user guide for the device that you connect to the product.

Keys and parts

Get to know your portable charger.
1   Charger and data cable (CA-189CD)
2   USB connectors for charging phones
3   Micro-USB connector
4   Power indicator key
5   Indicator lights

The surface of this product is nickel-free.

Some of the accessories mentioned in this user guide, such as charger, headset, or data cable, may be sold separately.
Charge your portable charger

The built-in battery has been partially charged at the factory, but you may need to recharge it before you can use your portable charger.

Charge your portable charger in the correct temperature: 0°C – +45°C. If the temperature is outside this range, all the indicator lights blink fast, and your portable charger stops charging.

1. Plug a compatible USB charger (sold separately) into a wall outlet. You can also charge your portable charger from a computer with the charger cable.
2. Connect the micro-USB end to your portable charger.

The indicator lights switch on and 1 indicator light blinks steadily while the battery is charging, showing you the progress. When the battery is fully charged, all the indicator lights switch on for 10 seconds and then switch off.

3. When the battery is full, disconnect the USB charger or the cable from your portable charger, then from the wall outlet or computer. Your charger shows you the remaining battery level for 10 seconds.

Check the battery level
Press the power indicator key. The indicator lights switch on for 10 seconds, showing you the remaining battery level.

If the battery is empty, the first indicator light blinks fast. Charge your portable charger.
Charge your phone with the portable charger

Phone battery running out, and no wall outlet or charger nearby? Use the portable charger to charge your phone or other compatible device on the go.

Use your portable charger to charge your phone in the correct temperature: -15°C – +55°C. If the temperature is outside this range, all the indicator lights blink fast, and your portable charger stops charging.

1. Connect the USB end of the charger cable to one of the USB connectors of your portable charger.
2. Connect the other end of the cable to the charger connector of your phone.

Tip: If you have 2 charger cables, you can charge 2 phones at the same time.

The indicator lights switch off while charging. You can press the power indicator key to check the remaining battery level.

Check your phone for the charging progress. The charging time varies depending on your phone and the usage.
Charge your phone and portable charger together

Both your phone and portable charger battery low? Find a wall outlet to charge them together.

1. Connect your phone to the portable charger with the charger cable. Use the USB connector furthest from the micro-USB connector.
2. Connect the portable charger to a USB charger plugged into a wall outlet.

Your phone charges first. The charging time varies depending on your phone and the USB charger.

The indicator lights switch on and 1 indicator light blinks steadily while the portable charger is charging. When it’s fully charged, all the indicator lights switch on for 10 seconds and then switch off.
Take care of your device

Handle your device, battery and accessories with care. The following suggestions help you keep your device operational.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits. If your device gets wet, let the device dry.
- Do not use or store the device in dusty or dirty areas.
- Do not store the device in high temperatures. High temperatures may damage the device or battery.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.
- Do not open the device.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device or the battery. Rough handling can break it.
- Only use a soft, clean, dry cloth to clean the surface of the device.

Recycle

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. All materials of the device can be recovered as materials and energy. Check how to recycle your products at www.microsoft.com/mobile/recycle.

Crossed-out wheeled-bin symbol

The crossed-out wheeled-bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products and batteries must be taken to separate collection at the end of their working life. Do not dispose of these products as unsorted municipal waste: take them for recycling. For info on your nearest recycling point, check with your local waste authority, or go to www.microsoft.com/mobile/support/. For more info on the environmental attributes of your device, see www.microsoft.com/mobile/ecoprofile.

Battery and charger info

Your device has an internal, non-removable, rechargeable battery. Do not attempt to remove the battery, as you may damage the device.

Microsoft Mobile may make additional battery or charger models available for this device.

Battery and charger safety

To unplug a charger or an accessory, hold and pull the plug, not the cord.

When your charger is not in use, unplug it. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 15°C and 25°C (59°F and 77°F) for optimal performance. Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily.

Do not dispose of batteries in a fire as they may explode. Obey local regulations. Recycle when possible. Do not dispose as household waste.

Do not dismantle, cut, crush, bend, puncture, or otherwise damage the battery in any way. If a battery leaks, do not let liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, or seek medical help. Do not
modify, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved or incompatible batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors. Do not charge your device during a lightning storm.

The DC-32 battery contains REACH SVHC substance (1-Methyl-2-pyrrolidinone, CAS 872-50-4) over 0.1% of its weight. Normal use of the product does not expose you to 1-Methyl-2-pyrrolidinone.

FCC/INDUSTRY CANADA NOTICE

This device complies with part 15 of the FCC rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. For more info, go to transition.fcc.gov/oet/rfsafety/RF-faqs.html. Any changes or modifications not expressly approved by Microsoft Mobile could void the user’s authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
