Safety

Read these simple guidelines. Not following them may be dangerous or illegal.

⚠️ INTERFERENCE
All wireless devices may be susceptible to interference, which could affect performance.

🔧 QUALIFIED SERVICE
Only qualified personnel may install or repair this product.

🔨 BATTERIES, CHARGERS, AND OTHER ACCESSORIES
Use only batteries, chargers, and other accessories approved by Microsoft Mobile for use with this device. Do not connect incompatible products.

💧 KEEP YOUR DEVICE DRY
Your device is not water-resistant. Keep it dry.
About your accessory

With the Wireless Charging Plate DT-903, you can charge the battery of your phone without connecting any cables to your phone. Your wireless charging plate can also let you know, for example, when the battery on your phone is running low, or when you’ve missed a call or you have unread messages.

Your wireless charging plate is compliant with the Qi standard.

NFC works with Lumia devices supporting NFC. The smart features, such as alerts on low battery level or missed calls, require the Lumia Denim (Windows Phone 8.1 Update 1) software release, Device Hub 3.6 or higher, and Bluetooth 4.0 or higher.

For more info on operation and safety, see the user guide of your phone or other device.
Keys and parts

Get to know your wireless charging plate.
1  USB connector
2  Charging area for charging the phone
3  NFC area
4  Multifunction key
5  Charging and notification indicator light
The surface of this product is nickel-free.
Charge your phone

It’s simple: place your phone or another Qi-compatible device on the charging plate to start charging.

1. Connect the USB cable of your charging plate to a compatible charger plugged into a wall outlet, or to a suitable USB power source.
2. Make sure the charging plate is facing up and there’s nothing on the plate.
3. Place your phone on the charging plate. The indicator light is on while the phone charges, and fades out when the battery is full.

It’s normal for the charging plate and phone to get warm while charging. If there’s a problem with the charging, the indicator light flashes quickly.
Get notifications

To get notified about a low charging level on your phone, or about missed calls or messages, among other things, pair your charging plate with your phone using NFC or Bluetooth.

Make sure your charging plate is connected to a power source.

For more info on how to switch NFC or Bluetooth on, see your phone's user guide.

1. When using NFC, touch the NFC areas of your charging plate and phone together.
   When using Bluetooth, on your phone, tap Settings > Bluetooth, and select your charging plate.

2. If asked, tap pair.

3. Tap Settings > device hub, and choose how you want your charging plate to notify you.

To adjust the indicator light brightness, or to dismiss a notification, press the multifunction key. To clear the Bluetooth pairing, press the multifunction key for more than 8 seconds.
About Bluetooth connectivity

You can use Bluetooth to connect wirelessly to other compatible devices, such as mobile phones. The devices don't have to be in direct line of sight, but they must be within 10 metres (33 feet) of each other. The connection may be affected by obstructions such as walls or other electronic devices.

This device is compliant with Bluetooth Specification 4.0. Check with the manufacturers of other devices to determine their compatibility with this device.
**Indicator lights and multifunction key actions**

Wonder what the different lights on your charging plate mean or what the multifunction key does?

Product and safety info

Take care of your device

Handle your device, charger and accessories with care. The following suggestions help you keep your device operational.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits. If your device gets wet, let the device dry.
- Use the charger for intended purposes only. Improper use, or use of incompatible chargers may present a risk of fire, explosion, or other hazard. Never use a damaged charger.
- Do not attempt to charge a device having a damaged, cracked or open battery case or a device that is not compatible with Qi.
- Do not use or store the device in dusty or dirty areas.
- Do not store the device in high temperatures. High temperatures may damage the device.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.
- Do not open the device.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device or the battery. Rough handling can break it.
- Only use a soft, clean, dry cloth to clean the surface of the device.

During extended operation, the device may feel warm. In most cases, this is normal. If the device is not working properly, take it to the nearest authorised service facility.

Recycle

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. All materials of the device can be recovered as materials and energy. Check how to recycle your products at [www.nokia.com/recycle](http://www.nokia.com/recycle).

Battery and charger info

Microsoft Mobile may make additional battery or charger models available for this device.

Implanted medical devices

To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
- Not carry the wireless device in a breast pocket.
- Switch the wireless device off if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

**FCC/INDUSTRY CANADA NOTICE**

This device complies with part 15 of the FCC rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. For more info, go to [transition.fcc.gov/oet/rfsafety/rf-faqs.html](http://transition.fcc.gov/oet/rfsafety/rf-faqs.html). Any changes or modifications not expressly approved by Microsoft Mobile could void the user’s authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
