Downloading Contacts

This document describes how to download contacts from a Nokia E50 device to a Nokia 616 Car Kit when using a Bluetooth connection and the Bluetooth SIM Access Profile mode (remote SIM access). It is also possible to use the Bluetooth Hands-free Profile mode. To use the Nokia E50 in Handsfree Mode, you need to disable Remote SIM Access in the Nokia E50, since this cannot be done on the Nokia 616.

To be able to download the contacts, you must have the following:

- A Nokia E50.
- A Nokia 616 Car Kit installed.

Downloading contacts for the first time

- 1 Switch on the Nokia E50.
- 2 In the Nokia E50, select **Menu** → **Connect** → **Bluetooth**. Set a Bluetooth name for the Nokia E50, and enable Bluetooth and remote SIM access. **Remote SIM mode** is disabled by default.

If there is an existing pairing with a Nokia 616 Car Kit, remove it.

- 3 Switch on the Nokia 616 Car Kit. If this is the first time you are using the Nokia 616 Car Kit, select a language. After this, select usage mode, then Bluetooth phone, and start to search for available Bluetooth devices. In the list of found devices, scroll and select your Nokia E50. The Bluetooth connection requires a separate, 16-character passcode. When requested, enter the 16-character passcode in the Nokia E50. You get the passcode from the Nokia 616 Car Kit.
- 4 Next, the Nokia E50 asks if you want to accept a Bluetooth connection from the Nokia 616 Car Kit. When you accept it, the Nokia E50 goes to the remote

SIM access mode indicated by an icon showing that there is no network connection in the Nokia E50. If PIN code request is on in the Nokia E50, the Nokia 616 Car Kit asks you to enter it. Enter the PIN code, and if you do not want to enter it again, select to save the remote PIN code. Note that this is a security issue. For more information, see the Nokia 616 Car Kit User Guide.

- 5 When the Nokia 616 Car Kit asks if you want to download contacts from the mobile phone, **answer No**.
- 6 In the Nokia E50, select **Menu**→ **Connect**→ **Bluetooth** again and go to the **Paired devices** page with the joystick. Edit the pairing with the Nokia 616 Car Kit and set it as **authorised**. This simplifies using the remote SIM access mode in the future.
- 7 In the Nokia 616 Car Kit, select **Menu**→ **User data**→ **Settings for User 1**→ **Download settings**→ **Download from**, and select to download from the phone memory, from the SIM card, or from both locations.
- 8 In Nokia 616 Car Kit, select **Menu**→ **User data**→ **Download contacts**.

After the download is complete, you see a short notice in the Nokia E50 and on the display of the Nokia 616 Car Kit.

Downloading contacts later

To download contacts to Nokia 616 Car Kit any time after the initial setup, do the following:

- 1 Switch on the Nokia E50.
- 2 Switch on the Nokia 616 Car Kit.
- 3 Make sure the Nokia 616 Car Kit connects to the Nokia E50, and that the Nokia E50 goes to the remote SIM access mode. This is indicated by the icon showing that there is no network connection in the Nokia E50.
- 4 In the Nokia 616 Car Kit, select **Menu**→ **User data**→ **Download contacts**.

Note: Contacts are downloaded from the selected memory (phone memory, SIM card, or both). To change this setting, see step 6 in "Downloading contacts for the first time".

Troubleshooting

If the contact download fails, do the following:

- 1 Remove the Bluetooth pairing in the Nokia E50.
- 2 Remove the Bluetooth pairing in the Nokia 616 Car Kit:
 1. Switch off the Nokia 616 Car Kit.
 2. Insert the SIM card into the SIM card reader of the Nokia 616 Car Kit.
 3. Restart the Nokia 616 Car Kit, and select **Use car SIM for this session** during the startup.
 4. After the Nokia 616 Car Kit has logged onto the network, select **Menu**→ **Bluetooth**→ **View paired devices**.

5. Select the Nokia E50 from the list of paired devices and press the wheel button.
6. Select **Delete pairing** and confirm the deletion.
7. Switch off the Nokia 616 Car Kit and remove the SIM card. The Bluetooth pairing is now removed.
- 3 Insert the SIM card into the SIM card slot of the Nokia E50 and switch on the device.
- 4 Restart the Nokia 616 Car Kit by turning off the power of your car and then turning it back on.
- 5 Recreate the pairing as instructed above in "Downloading contacts for the first time".
